Round The World Without Reservations:

Without Reservation Randy Kritkauskay, 2020-08-11 A powerful story of spiritual awakening reconnection with Nature and rekindling of ancestral wisdom Details the author s encounters with ancestral spirits and animal teachers such as Coy Wolf and profound moments of direct connection with the natural world Shows how ancestral connections and intimate communications with Nature are not unique or restricted to those with indigenous cultural roots Reveals how reconnection with ancestors and the natural world offers insight and solutions for the complex problems we face We are but a few generations removed from millennia spent living in intimate contact with the natural world and in close commune with ancestral spirits Who we are and who we think we are is rooted in historical connections with those who came before us and in our relationships with the land and the sentient natural world When we wander too far from our roots our ancestors and kin in the natural world call us home sometimes with gentle whispers and sometimes in loud voices sounding alarms In this powerful story of spiritual awakening Randy Kritkauskay shares his journey into the realm of ancestral Native American connections and intimate encounters with Mother Earth and shows how anyone can spiritually reconnect with their ancestors and Nature Like 70 percent of those who identify as Native American Kritkauskay grew up off the reservation As he explains for such off reservation indigenous people rediscovering ancestral practices amounts to a reawakening and offers significant insights about living in a society that is struggling to mend a heavily damaged planet The author reveals how the awakening process was triggered by his own self questioning and the resumption of ties with his Potawatomi ancestors He details his encounters with ancestral spirits and animal teachers such as Coy Wolf He shares moments of direct connection with the natural world moments when the consciousness of other living beings flora and fauna became accessible and open to communication Through his profound storytelling Kritkauskay shows how ancestral connections and intimate communications with Nature are not unique or restricted to those with indigenous cultural roots Offering a bridge between cultures a path that can be followed by Native and non Native alike the author shows that spiritual awakening can happen anywhere for anyone and can open the gateway to deeper understanding

the goodness of humanity and the ability of individuals to rise above personal suffering Each person Dorinda has met throughout her life has deeply touched her heart and remains imbedded in her soul In sharing her memoirs Dorinda hopes the stories will touch people and empower them to empathize with those who struggle Without Reservation D. Dobrzycki, 2013-06-29 In 1965 the International Union of the History and Philosophy of Science founded the Nicolas Copernicus Committee whose main task was to explore the means by which different nations could co-operate in celebrating the 500th anniversary of the great scholar's birth The committee initiated the publication of a collection of studies dealing with the effect that Copernicus' theory has had on scientific developments in centres of learning all over the world An Editorial Board consisting of J Dobrzycki Warsaw J R Ravetz Leeds H Sandblad Goteborg and B Sticker Hamburg was nominated We found that our initiative aroused a lively interest among Copernicus scholars the present volume with 11 articles by authors from nine American Asian and European countries contains the result of their research It appears in the series *Studia Copernicana* by agreement with the Polish Academy of Science and we hope to publish a number of other contributions in a subsequent volume We are happy to say that our efforts have been fruitful and that this volume presents not only several in-depth studies but also a more general survey of the rules governing the evolution of science rules set within the framework of Copernicus' theory as it developed among various nations and in various scientific institutions over the centuries It has been shown once again that 500 years after his birth the work of Copernicus remains a source of scientific interest and continues to stimulate fresh study and research **The UN Convention on the Rights of Persons with Disabilities** Great Britain. Parliament. Joint Committee on Human Rights, 2009 The UN Convention on the Rights of Persons with Disabilities builds on existing human rights treaties including the International Covenant on Civil and Political Rights and the International Covenant on Economic Social and Cultural Rights The UN Handbook for Parliamentarians on the Convention stresses that it is not intended to create new rights but clarifies the obligations and legal duties of States to respect and ensure the equal enjoyment of all human rights by all persons with disabilities Its purpose is to promote protect and ensure the full enjoyment of all human rights and fundamental freedoms by all persons with disabilities and to promote respect for their inherent dignity The UK was among the first countries to sign the Convention on 30 March 2007 The findings of our recent inquiry on the rights of adults with learning disabilities showed that although UK law and policy on the treatment of adults with learning disabilities takes a human rights based approach the day to day experiences of people with learning disabilities are not so positive Ratification will send a strong signal to all people with disabilities in the UK and abroad that the Government takes equality and the protection of their human rights seriously The Government first publicly stated that reservations to the Convention were being considered in its response to our Report on the treatment of adults with learning disabilities in May 2008 more than a year after it signed the Convention Despite the Committee's call for a full

explanation of the government's views on the compatibility of domestic law with the Convention they were then provided with little detail on the reservations being considered or the Government's approach to the process. The Committee considers that progress towards ratification of the Convention by the UK has so far lacked transparency and has unfortunately alienated disabled people and their organisations. This is unacceptable in the light of the clear Convention commitment which the Government intends to make to the involvement of disabled people in the development of policies and laws which affect them. This approach undermines the previous role that the UK Government has played in championing equality for disabled people and their leading role in negotiating the terms of the UNCRPD. *Professional Journal of the United States Army*, 1949

The Self in Health and Illness Frances Rapport, Paul Wainwright, 2016-07-06 This book contains a foreword by Elliot G Mishler, professor of Social Psychology, Department of Psychiatry, Harvard Medical School. Patients' views of their identity change with illness as do health professionals' views of them. This book discusses how and why this happens and examines how more awareness of this phenomenon can lead to better care. Providing examples from diverse clinical settings, *The Self in Health and Illness* brings together writers from a range of backgrounds including health science, anthropology, sociology, psychology, nursing, medical ethics and healthcare. It considers the narrative self or constructions of identity and its place within healthcare and the medical humanities and assists in clarifying the understanding of self in the context of illness, health and medicine. An enlightening read for all doctors, especially those with an interest in medical humanities, this anthology is also invaluable for undergraduate and postgraduate students of medical humanities, researchers in health sciences and medical ethics. It will also be of great interest to medical anthropologists, psychologists, psychiatrists and other healthcare professionals. If you ask people questions about their lives, they tell stories that express some version of who they are. Within the healthcare field, narrative researchers from various health professions and social science disciplines have been particularly interested in the potential impact of disability and illness on patient identities. What we find here is an array of quite systematic approaches to the complexities with which people narrate, perform and possibly transform their identities through their stories. This is a serious undertaking and the editors and authors of these papers treat it with deep respect for our common struggle to make sense of our lives by achieving identities we can live with. Elliot G Mishler in the Foreword.
