Roxy Paine Joseph D. Ketner, Roxy Paine, Contemporary Arts Museum, 2002 Artwork by Roxy Paine Edited by Lynn Herbert Contributions by Joseph Ketner Text by Gregory Volk Marti Mayo Roxy Paine Eleanor Heartney, Roxy Paine, 2009 Relationships between human creativity natural growth and industrial production are at the heart of Roxy Paine's body of work surveyed here for the first time by critic Eleanor Heartney It includes stainless steel Dendroids tree-like sculptures installed in urban or sylvan environments hand fabricated Replicants uncannily mimicking plant life and elaborate machines that simulate human art making and natural erosion Together they serve often with doses of black humour as vehicles to consider profound dilemmas we face in a future where nature and technology inextricably are fused From the book jacket

Roxy Paine Roxy Paine, Scott Rothkopf, 2001 Roxy Paine, 2018-11-13 Sculptor Roxy Paine's installations can feel like a cross between an alien landscape or a mad scientist's laboratory inside of a Twilight Zone episode Bringing together science and the natural world his surreal and sometimes eerie work has garnered him an elevated place in the pantheon of uber creative artists who create their own fantastical universes This monograph the most comprehensive on the market expertly surveys nearly 20 years of work Since 1989 Roxy Paine has been filling galleries museums and sites worldwide with his dark whimsical installations and sculptures melding the industrial and the organic to explore manmade and natural systems and their ramifications Paine divides his work into categories Art Making Machines mad scientist mini factories that produce works of art Replicants replicas of flora and fungi made out of industrial materials Fungal Fields painterly compositions of his fungi sculptures Specimen Cases vitrines filled with his fungal and floral replicas and Dendroids metal tree-like forms Through these industrial natural visions Paine reveals the horror and wonder when science and nature collide

(New York, N.Y.), Mad. Sq. Art (Program), 2007 Roxy Paine: The Dioramas SAUL. ANTON, 2020-10-27 Roxy Paine's seven intricately fabricated dioramas expand his explorations of the intersections between the monumental and the microscopic the natural and the artificial the material and the ideal Brooklyn based painter and installation artist Roxy Paine born 1966

conceived his Dioramas in the 1990s but only began to produce these technically ambitious works in 2012. Brilliantly reinventing the 19th century diorama form, these works of which he has created seven, the last completed in 2017, deepen Paine's engagement with altered realities and the psychogeography of American life and modern culture. Edited by Saul Anton, the volume includes an extended conversation between Paine and Wexner Center of the Arts curator Michael Goodson, who organized *Serotonin Reuptake Inhibitor*, a 2016 exhibition of the Dioramas at the Beeler Gallery of the Columbus College of Art Design. It also includes essays by Blaffer Museum director Steven Matijcio and critics Saul Anton and Mia Kang that explore their rich historical and social resonance and reflect on their place in the landscape of contemporary art and art history.

[Urban Forests](#) Jill Jonnes, 2017-09-05. Far-ranging and deeply researched, *Urban Forests* reveals the beauty and significance of the trees around us. Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction*, Jonnes extols the many contributions that trees make to city life and celebrates the men and women who stood up for America's city trees over the past two centuries. An authoritative account. Gerard Helferich, *The Wall Street Journal*. We all know that trees can make streets look prettier. But in her new book *Urban Forests*, Jill Jonnes explains how they make them safer as well. Sara Begley, *Time Magazine*. A celebration of urban trees and the Americans, presidents, plant explorers, visionaries, citizen activists, scientists, nurserymen, and tree nerds whose arboreal passions have shaped and ornamented the nation's cities from Jefferson's day to the present. As nature's largest and longest-lived creations, trees play an extraordinarily important role in our cities: they are living landmarks that define space, cool the air, soothe our psyches, and connect us to nature and our past. Today, four-fifths of Americans live in or near urban areas surrounded by millions of trees of hundreds of different species. Despite their ubiquity and familiarity, most of us take trees for granted and know little of their fascinating natural history or remarkable civic virtues. Jill Jonnes's *Urban Forests* tells the captivating stories of the founding mothers and fathers of urban forestry, in addition to those arboreal advocates presently using the latest technologies to illuminate the value of trees to public health and to our urban infrastructure. The book examines such questions as the character of American urban forests and the effect that tree-rich landscaping might have on commerce, crime, and human well-being. For amateur botanists, urbanists, environmentalists, and policymakers, *Urban Forests* will be a revelation of one of the greatest, most productive, and most beautiful of our natural resources.
