bellicose nobles practices of violence shaped provincial society and the royal state in early modern France The southern French provinces of Guyenne and Languedoc suffered almost continual religious strife and civil conflict between 1598 and 1635 providing an excellent case for investigating the dynamics of early modern civil violence Warrior Pursuits constructs a cultural history of civil conflict analyzing in detail how provincial nobles engaged in revolt and civil warfare during this period Brian Sandberg s extensive archival research on noble families in these provinces reveals that violence continued to be a way of life for many French nobles challenging previous scholarship that depicts a progressive civilizing of noble culture Sandberg argues that southern French nobles engaged in warrior pursuits social and cultural practices of violence designed to raise personal military forces and to wage civil warfare in order to advance various political and religious goals Close relationships between the profession of arms the bonds of nobility and the culture of revolt allowed nobles to regard their violent performances as heroic gestures and beautiful warrior acts Warrior nobles represented the key organizers of civil warfare in the early seventeenth century orchestrating all aspects of the conduct of civil warfare from recruitment to combat according to their own understandings of their warrior pursuits Building on the work of Arlette Jouanna and other historians of the nobility Sandberg provides new perspectives on noble culture state development and civil warfare in early modern France French historians and scholars of the Reformation and the European Wars of Religion will find Warrior Pursuits engaging and insightful

Religious Belief and Ecclesiastical Careers in Late Medieval England Christopher Harper-Bill,1991 Papers reflecting current research on orthodox religious practice and ecclesiastical organisation from c 1350 c 1500 This book derives from a conference held in 1989 It reflects current research on ecclesiastical organisation and on aspects of religious belief from the Black Death to the English Reformation On the wider front there is an account of the diplomatic relations between the Pope and those who ruled for the infant Henry VI Regional studies focus on Carthusians in Somerset and the continued attraction of the eremitical life on the canons of Exeter cathedral and on the foundation of chantries and the endowment of churches Taken together these essays show how late medieval religious belief was undermined by a variety of factors and point up the contrast between the humanity and sensitivity of medieval religion and the nature of the faith which replaced it Contributors CLIVE BURGESS ROBERT W DUNNING MICHAEL J HAREN MARGARET HARVEY D N LEPINE COLIN RICHMOND ROBERT N SWANSON BENJAMIN THOMPSON

Carol Crawford Holcomb, 2020-04-07 A critical examination of the Woman's Missionary Union and how it shaped the views of Southern Baptist women The Woman's Missionary Union WMU founded in 1888 carved out a uniquely feminine space within the Southern Baptist Convention during the tumultuous years of the Progressive Era when American theologians were formulating the social gospel These women represented the Southern Baptist elite and as such had the time to read write and discuss ideas with other Southern progressives They rubbed shoulders with more progressive Methodist and Presbyterian women in clubs and ecumenical missionary meetings Baptist women studied the missionary publications of these other denominations and adopted ideas for a Southern Baptist audience Home without Walls Southern Baptist Women and Social Reform in the Progressive Era shows how the social attitudes of women were shaped at the time By studying primary documents including personal letters official exchanges and memoranda magazine publications newsletters and editorials Carol Crawford Holcomb uncovers ample evidence that WMU leaders aware of the social gospel and sympathetic to social reform appropriated the tools of social work and social service to carry out their missionary work Southern Baptist women united to build a financial empire that would sustain the Southern Baptists through the Great Depression and beyond Their social attitudes represented a kaleidoscope of contrasting opinions By no stretch of the imagination could WMU leaders be characterized as liberal social gospel advocates However it would also be wrong to depict them as uniformly hostile to progressivism or ignorant of contemporary theological ideas In the end they were practical feminists in their determination to provide a platform for women's views and a space for women to do meaningful work **The Ancient Israelite World**

Winning Workplace Wars Rev Emmanuel Oghene-Emmanuel,2024-12-17 Life they say is a battlefield from birth to death Workplace is where man tries to earn a living and there is a constant struggle for survival there like in any other part of life As a shepherd in training David battled wild animals to protect his father s flock that he was looking after When God took him from there to become king of Israel he had to wage another kind of battle It was where the priest Ahimelech was doing his legitimate job that David and Doeg visited and that visit led to the cutting short of Elimelech s life alongside that of his family and relatives and their possession in a single day This is even though he was engaged in God s work or sacred service rather than secular work Ecclesiastes 10 9 means there is life threatening risk in all human endeavours anywhere under the sun Luke 24 19 20 and Acts 10 38 29 say the fact that Jesus spent all His time going about doing good did not stop some from battling Him to death before God raised Him to life after three days I1 Samuel 7 8 9 and 1 Chronicles 17 7 8 say the journey from humble background to greatness is fraught with enemies who must be battled and defeated that require God s intervention to remove the enemies for the journey to be successful If God had not intervened David would not have

completed his victoriously **May 3-6, 10, 11, 20, July19, 1965, Appendix I. 1030 p** United States. Congress. House. Select Committee on Small Business. Subcommittee on Activities of Regulatory Agencies,1966 The Later Medieval City David Nicholas,2014-06-17 The Later Medieval City 1300 1500 the second part of David Nicholas s ambitious two volume study of cities and city life in the Middle Ages fully lives up to its splendid precursor The Growth of the Medieval City Like that volume it is fully self sufficient though many readers will want to use the two as a continuum This book covers a much shorter period than the first That traced the rise of the medieval European city system from late Antiquity to the early fourteenth century this offers a portrait of the fully developed late medieval city in all its richness and complexity David Nicholas begins with the economic and demographic realignments of the last two medieval centuries These fostered urban growth raising living standards and increasing demand for a growing range of urban manufactures The hunger for imports and a shortage of coin led to sophisticated credit mechanisms that could only function through large cities But if these changes brought new opportunities to the wealthy they also created a growing problem of urban poverty violence became endemic in the later medieval city Moreover although more rebellions were sparked by taxes than by class conflict class divisions were deepening Most cities came to be governed by councils chosen from guild members and most guilds were dominated by merchants The landowning elite that had dominated the early medieval cities of the first volume still retained its prestige but its wealth was outstripped by the richer merchants while craftsmen who had little political influence were further disadvantaged as access to the guilds became more restricted The later medieval cities developed permanent bureaucracies providing a huge range of public services and they were paid for by sophisticated systems of taxation and public borrowing The survival of their fuller richer records allow us not only to apply a more statistical approach but also to get much closer to the splendours and squalors of everyday city life than was possible in the earlier volume The book concludes with a set of vibrant chapters on women and children and religious minorities in the city on education and culture and on the tenor of ordinary urban existence Like its predecessor this book is massively and vividly documented Its approach is interdisciplinary and comparative and its examples and case studies are drawn from across Europe from France England Germany the Low Countries Iberia and Italy with briefer reviews of the urban experience elsewhere from Baltic to Balkans The result is the most wide ranging and up to date study of its multifaceted subject It is a formidable achievement
