Africa and the Global System of Capital Accumulation Emmanuel O Oritsejafor, Allan D. Cooper, 2021-04-17 Africa and the Global System of Capital Accumulation offers a groundbreaking analysis of the strategic role Africa plays in the global capitalist economy The exploitation of Africa s rich resources as well as its labor make it possible for major world powers to sustain their authority over their own middle class populations while rewarding African collaborators in leadership positions for subjecting their populations into poverty and desperation Middle class obsessions such as computers mobile phones cars and the petroleum that fuels them diamonds chocolate all of these products require African resources that are typically obtained by child or slave labor that helps to generate billionaires out of foreign investors while impoverishing most Africans Oritsejafor and Cooper demonstrate that primitive accumulation believed by both Adam Smith and Karl Marx to be a process that precedes capitalism is actually an integral part of capitalism They also validate the thesis that capitalism incorporates racism as an organizing tool for the exploitation of labor in Africa and on a global scale Case studies are presented on Nigeria Cote d Ivoire Ghana Liberia Congo Tanzania Somalia Angola Namibia Sao Tome and Principe and South Sudan There are also chapters analyzing the interests of Russia and China in Africa This book will be of interest to students and scholars of African politics development and economics **U.S.**

Corkin, 2014-11-13 *Europeanization of Judicial Review* argues that the higher complexity of the political framework in which laws are made today leads to less well designed laws and loop holes allowing politicians to leave decisions to the courts The higher complexity of the political framework is a result of the need in the EU to consider both national and European legal and political rules when phrasing new laws Both to decrease the complexity in the design of legislation and to preserve the ideal of the rule of law the courts now are more likely to rule laws unconstitutional The book employs a wide range of quantitative and qualitative methods to collect new data about the German Austrian and Italian constitutional courts over the last four decades These three courts have a comparable

history theoretical background and structure while differing in two key components length of EU membership and legitimacy perception Corkin employs multi method research based on over fifty interviews with judges politicians and civil servants content analysis of abstract judicial review cases over three decades and a database of over 300 variables relating to the courts and their surroundings Her data reveals that in abstract judicial review and in the wider political arena political culture has become more confrontational due to attitude changes in politicians and judges These attitude changes can be directly linked to the EU and have wide ranging implications for legitimacy democracy and political methodology Presenting a bridge between the revitalized realist and legalist debate Europeanization of Judicial Review will contribute to socio legal theory literature on comparative courts and both new institutionalism and Europeanization theory
