Children's Books in Print R R Bowker Publishing,Bowker,1999-12 **Forthcoming Books** Rose Arny,2000 **The New Typography in Scandinavia** Trond Klevgaard,2020-10-15 This is the first monograph on Scandinavia's New Typography It provides a detailed account of the movement's lifespan in the region from the 1920s up until the 1940s when it was largely incorporated into mainstream practice The book begins by tracing how the New Typography from its origins in the central and eastern European avant garde arrived in Scandinavia It considers the movement's transformative impact on printing detailing the cultural and technological reasons why its ability to act as a modernising force varied between different professional groups The last two chapters look at how New Typography related to Scandinavian society more widely by looking at its ties to functionalism and social democracy paving the way for a discussion of the reciprocal relationship between the culture of practitioners and the cultural work performed through their practice Based on archival research undertaken at a number of Scandinavian institutions the book brings a wealth of previously unpublished visual material to light and provides a fresh perspective on a movement of central and enduring importance to graphic design history and practice *Sweden* Axel Johan Josef Guinchard,1914 *Scandinavia* ,1883 **The Cyclopaedia; Or, an Universal Dictionary of Arts, Sciences, and Literature** Abraham Rees,1819 **A Gazetteer of the World** ,1859 The Regional and Transregional in Romanesque Europe John McNeill,Richard Plant,2021-11-29 The Regional and Transregional in Romanesque Europe considers the historiography and usefulness of regional categories and in so doing explores the strength durability mutability and geographical scope of regional and transregional phenomena in the Romanesque period This book

addresses the complex question of the significance of regions in the creation of Romanesque particularly in relation to transregional and pan European artistic styles and approaches The categorization of Romanesque by region was a cornerstone of 19th and 20th century scholarship albeit one vulnerable to the application of anachronistic concepts of regional identity Individual chapters explore the generation and reception of forms the conditions that give rise to the development of transregional styles and the agencies that cut across territorial boundaries There are studies of regional styles in Aquitaine Castile Sicily Hungary and Scandinavia workshops in Worms and the Welsh Marches the transregional nature of liturgical furnishings the cultural geography of the new monastic orders metalworking in Hildesheim and the valley of the Meuse and the links which connect Piemonte with Conques The Regional and Transregional in Romanesque Europe offers a new vision of regions in the creation of Romanesque relevant to archaeologists art historians and historians alike
