Scandinavian Language Contacts:

Scandinavian Language Contacts P. Sture Ureland, Iain Clarkson, 1984-10-18 This authoritative collection examines both language contacts in Scandinavia proper and also contacts with non Scandinavian languages The language situation in Scandinavia is a rich and complex one yet hitherto little of the material has been available in English All the essays have as their basic tenet that the essence of every language is the way in which it varies in its development and social use and that this variation is a result of a whole series of geographical sociological and linguistic factors settlement conquest trade and literary bilingualism Together they provide a valuable overview of Scandinavian language contacts at both the synchronic and the diachronic level which will be of interest not only to Germanists and Scandinavianists but also to historical linguists

The Nordic Languages Oskar Bandle, Lennart Elmevik, Gun Widmark, 2002 Annotation This handbook is conceived as a comprehensive history of the North Germanic languages from the oldest times up to the present day Whereas most of the traditional presentations of Nordic language history are confined to individual languages and often concentrate on purely linguistic data the present work covers the history of all Nordic languages in its totality embedded in a broad cultural historical context The Nordic languages are described both individually and in their mutual dependence as well as in relation to the neighboring non Nordic languages The handbook is not tied to a particular methodology but keeps in principle to a pronounced methodological pluralism encompassing all aspects of actual methodology Moreover it combines diachronic with synchronic systematic aspects longitudinal sections with cross sections periods such as Old Norse transition from Old Norse to Early Modern Nordic Early Modern Nordic 1550 1800 and so on The description of Nordic language history is built upon a comprehensive collection of linguistic data it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and English speaking countries The organization of the handbook combines a central part on the detailed chronological developments and some chapters of a more general character chapters on theory and methodology in the beginning and on overlapping spatio temporal topics in the end

The Languages of Scandinavia Ruth H. Sanders, 2017-11-24 A much needed comprehensive and accessible overview of the interrelationship among Danish Norwegian Swedish Icelandic Faroese Finnish and Sami Ilmari Ivaska Scandinavian Studies From fjords to mountains schools of herring to herds of reindeer Scandinavia is rich in astonishing natural beauty Less well known however is that it is also rich in languages Home to seven languages Scandinavia has traditionally been understood as linguistically bifurcated between its five Germanic languages Danish Norwegian Swedish Icelandic and Faroese and its two Finno Ugric ones Finnish and Sami In The Languages of Scandinavia Ruth H Sanders takes a pioneering approach she considers these Seven Sisters of the North together While the two linguistic families that comprise Scandinavia's languages ultimately have differing origins

the Seven Sisters have coexisted side by side for millennia As Sanders reveals a crisscrossing of names territories and even to some extent language genetics intimate language contact has created a body of shared culture experience and linguistic influences that is illuminated when the story of these seven languages is told as one Exploring everything from the famed whalebone Lewis Chessmen of Norse origin to the interactions between the Black Death and the Norwegian language The Languages of Scandinavia offers profound insight into languages with a cultural impact deep rooted and far reaching from the Icelandic sagas to Swedish writer Stieg Larsson s internationally popular Millennium trilogy Sanders s book is both an accessible work of linguistic scholarship and a fascinating intellectual history of language Focuses on contacts colonialism conflicts and causes of friction and the resulting language developments from a macro perspective a refreshing and pleasant read Verena H fig University of Illinois at Urbana Champaign

Language Contacts Meet English Dialects Esa Penttilä, 2020-06-12 This book presents a collection of fresh research on language contacts and dialects and the interface between the two The volume celebrates the work of Professor Markku Filppula an eminent scholar in the fields of Irish English Celtic contacts in the history of English and language contacts and vernacular universals in nonstandard Englishes The articles in this volume explore theories and methods employed in the study of language contacts and variation Celtic substrata in Irish and British English and dialect in the British Isles The writers perspectives range from cognitive processing to sociolinguistics and from theoretical and comparative discussions to new empirical corpus based studies

Language contact in the British Isles Per Sture Ureland, George Broderick, 2011-05-09 Over the past few decades the book series *Linguistische Arbeiten* Linguistic Studies comprising over 500 volumes has made a significant contribution to the development of linguistic theory both in Germany and internationally The series will continue to deliver new impulses for research and maintain the central insight of linguistics that progress can only be made in acquiring new knowledge about human languages both synchronically and diachronically by closely combining empirical and theoretical analyses To this end we invite submission of high quality linguistic studies from all the central areas of general linguistics and the linguistics of individual languages which address topical questions discuss new data and advance the development of linguistic theory

Language Contact and Development Around the North Sea Merja-Riitta Stenroos, Martti Mäkinen, Inge Særheim, 2012 This volume brings together eleven studies on the history of language and writing in the North Sea area with focus on contacts and interchanges through time Its range spans from the investigation of pre Germanic place names to present day Shetland the materials studied include glosses legal and trade documents as well as place names and modern dialects The volume is unique in its combination of linguistics and place name

studies with literacy studies which allows for a very dynamic picture of the history of language contact and texts in the North Sea area Different approaches come together to illuminate a major insight the omnipresence of multilingualism as a context for language development and a formative characteristic of literacy Among the contributors are experts on English Nordic and German language history The book will be of interest to a wide range of scholars and students working on the history of Northern European languages literacy studies and language contact Convergence and Divergence in Language Contact Situations Kurt Braunmüller,Juliane House,2009 This book deals with the consequences of converging and diverging processes and their development in language contact situations It provides insights into the various forms of language contact and the conditions under which bilingual speakers master their every day life in bilingual communities Its nine contributions cover both theoretical and typological aspects such as the classification of languages the role of language contact linguistic complexity and spontaneous speech innovations and convergence and divergence processes in translation morpho syntax and phonology phonetics Taken together these studies provide challenges for linguistic theories that generalize from situations of monolingualism suggesting instead that a sound linguistic theory cannot be a theory for just one single isolated language but must be a theory for at least two languages It must also account for the fact that some structures involved in contact situations are not kept apart but develop in such a way that the distance decreases between the languages involved **Congruence in Contact-Induced Language Change** Juliane Besters-Dilger,Cynthia Dermarkar,Stefan Pfänder,Achim Rabus,2014-08-22 Modern contact linguistics has primarily focused on contact between languages that are genetically unrelated and structurally distant This compendium of articles looks instead at the effects of pre existing structural congruency between the affected languages at the time of their initial contact using the Romance and Slavic languages as examples In contact of this kind both genetic and typological similarities play a part Accentual Change and Language Contact Joe Salmons,2003-08-29 The author presents an original proposal for a shared Celtic Germanic accentual system which has fundamental implications for Proto Germanic The Nordic Languages. Stability and Divergence in Language Contact Kurt Braunmüller, Steffen Höder, Karoline Kühl, 2014-11-15 Convergence i e the increase of inter systemic similarities is usually considered the default development in language contact situations This volume focuses on the other logical possibilities of diachronic development namely stability and divergence two well attested but under researched phenomena The contributions investigate the sociolinguistic and structural factors and mechanisms that lead to or at least reinforce both types of non convergence despite of language contact The contributions cover a wide range of language contact situations including standard and non standard varieties

German(ic) in language contact Christian Zimmer ,2021 It is well known that contact between speakers of different languages or varieties leads to dynamics in many respects From a grammatical perspective especially contact between closely related languages varieties fosters contact induced innovations The evaluation of such innovations reveals speakers attitudes and is in turn an important aspect of the sociolinguistic dynamics linked to language contact In this volume we assemble studies on such settings where typologically congruent languages are in contact i e language contact within the Germanic branch of the Indo European language family Languages involved include Afrikaans Danish English Frisian Low and High German and Yiddish The main focus is on constellations where a variety of German is involved which is why we use the term German ic in this book So far studies on language contact with Germanic varieties have often been separated according to the different migration scenarios at hand which resulted in somewhat different research traditions For example the so called Sprachinselforschung research on language islands has mainly been concerned with settings caused by emigration from the continuous German speaking area in Central Europe to locations in Central and Eastern Europe and overseas thus resulting in some variety of German abroad However from a linguistic point of view it does not seem to be necessary to distinguish categorically between contact scenarios within and outside of Central Europe if one thoroughly considers the impact of sociolinguistic circumstances including the ecology of the languages involved such as for instance German being the majority language and the monolingual habitus prevailing in

Germany but completely different constellations elsewhere Therefore we focus on language contact as such in this book not on specific migration scenarios Accordingly this volume includes chapters on language contact within and outside of Central Europe In addition the settings studied differ as regards the composition and the vitality of the languages involved The individual chapters view language contact from a grammar theoretical perspective focus on lesser studied contact settings e g German in Namibia make use of new corpus linguistic resources analyse data quantitatively study language contact phenomena in computer mediated communication and or focus on the interplay of language use and language attitudes or ideologies These different approaches and the diversity of the scenarios allow us to study many different aspects of the dynamics induced by language contact With this volume we hope to exploit this potential in order to shed some new light on the interplay of language contact variation and change and the concomitant sociolinguistic dynamics Particularly we hope to contribute to a better understanding of closely related varieties in contact
