Discourse Deborah Tannen, 1994-07-07 Deborah Tannen's *You Just Don't Understand* spent nearly four years in cloth and paper on The New York Times Best Seller list and has sold over a million and a half copies Clearly Tannen's insights into how and why women and men so often misunderstand each other when they talk has touched a nerve For years a highly respected scholar in the field of linguistics she has now become widely known for her work on how conversational style differences associated with gender affect relationships Her life work has demonstrated how close and intelligent analysis of conversation can reveal the extraordinary complexities of social relationships including relationships between men and women Now in *Gender and Discourse* Tannen has gathered together six of her scholarly essays including her newest and previously unpublished work in which language and gender are examined through the lens of sex class linked patterns rather than sex linked patterns These essays provide a theoretical backdrop to her best selling books and an informative introduction which discusses her field of linguistics describes the research methods she typically uses and addresses the controversies surrounding her field as well as some misunderstandings of her work She argues for instance that her cultural approach to gender differences does not deny that men dominate women in society nor does it ascribe gender differences to women's essential nature The essays themselves cover a wide range of topics In one she analyzes a number of conversational strategies such as interruption topic raising indirection and silence and shows that contrary to much work on language and gender no strategy exclusively expresses dominance or submissiveness in conversation interruption or overlap can be supportive silence and indirection can be used to control It is the interactional context the participants individual styles and the interaction of their styles Tannen shows that result in the balance of power She also provides a fascinating analysis of

four groups of males and females second sixth and tenth grade students and twenty five year olds conversing with their best friends and she includes an early article co authored with Robin Lakoff that presents a theory of conversational strategy illustrated by analysis of dialogue in Ingmar Bergman s Scenes from a Marriage Readers interested in the theoretical framework behind Tannen s work will find this volume fascinating It will be sure to interest anyone curious about the crucial yet often unnoticed role that language and gender play in our daily lives **Transit □ 'Norden' och 'Europa'** Petra
