Introductory Functional Analysis B.D. Reddy, 2013-11-27 Mathematics is playing an ever more important role in the physical and biological sciences proving a blurring of boundaries between scientific disciplines and a resurgence of interest in the modern as well as the classical techniques of applied mathematics This renewal of interest both in research and teaching has led to the establishment of the series Texts in Applied Mathematics TAM The development of new courses is a natural consequence of a high level of excitement on the research frontier as newer techniques such as numerical and symbolic computer systems dynamical systems and chaos mix with and reinforce the traditional methods of applied mathematics Thus the purpose of this textbook series is to meet the current and future needs of these advances and encourage the teaching of new courses TAM will publish textbooks suitable for use in advanced undergraduate and beginning graduate courses and will complement the Applied Mathematical Sciences AMS series which will focus on advanced textbooks and research level monographs

Preface A proper understanding of the theory of boundary value problems as opposed to a knowledge of techniques for solving specific

problems or classes of problems requires some background in functional analysis

Social Networks John Scott, 2002 This collection brings together the principal sources in the development of the techniques of social network analysis from early metaphorical statements in Simmel and Radcliffe Brown through the more systematic explorations in sociology and social anthropology to contemporary formalizations A new introduction explores the history of Social Networks and highlights the arguments of those who treat social network analysis as a loose qualitative approach as well as those who see its potential in technical mathematical uses The thematically organized coverage includes Part I Conceptualizing Social Networks Part II Topics and Developments in Graph Theory Part III Further Mathematical Models for Networks Part IV Applications Family and Community Part V Applications Corporate Power and Economic Structures Part VI Applications Political Protest and Policy Networks Part VII Applications Knowledge Reputation and Diffusion
