Private Landscapes Pamela Burton, Marie Botnick, 2002 When we think of the gardens of Southern California we tend to think of the enormous semiarid landscapes of the Huntington and Rancho Los Alamitos often built on the sprawling

grounds of former ranches But there is another garden tradition in Southern California the modest rectangular suburban plots designed by the most famous architects of mid century modernism Richard Neutra Rudolph Schindler Gregory Ain Raphael Soriano Harwell Hamilton Harris A Quincy Jones and John Lautner These architects saw the garden as an outdoor extension of the space of the houses they designed rather than a neo Spanish fantasy to be added later by a landscapist Their modern gardens made use of low maintenance drought resistant plants and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise The first book of its kind *Private Landscapes* profiles twenty significant gardens and their accompanying houses by these celebrated architects Using contemporary photographs by Julius Shulman and newly commissioned color images along with plans and plant lists *Private Landscapes* provides a never before seen look at these gardens As beautiful and practical now as they were 50 years ago these designs continue to provide inspiration for gardeners and designers everywhere **The International Studio** ,1910 *Building Art* Paul

Frank Lloyd Wright's Concrete Adobe Donald Leslie Johnson,2016-12-05 During the years 1919 into 1925 Frank Lloyd Wright worked on four houses and a kindergarten located in metropolitan Los Angeles using concrete blocks as the main building material The construction system has been described by Wright and others as uniquely molded woven like a textile fabric and perceived as ground breaking truly modern unprecedented Many have attempted to uphold these claims while some thought the house designs borrowed from old exotic buildings For the first time this book brings together Wright s declarations the support of upholders and inferences in order to determine their accuracy and correctness or the possibility of feigned or fictional stories It examines technical developments of concrete blocks by Wright and others before his experiences in Los Angeles began in 1919 It also studies the manner of Wright s design process by an examination of relevant pictorial and textual documents A unique in depth and critical analysis of the houses is set within historical

biographical and theoretical contexts Consequently the book explains the impact upon Wright of California contemporaries architects Irving Gill and Rudolph Schindler and their instrumentally profound role upon the course of modernism 1907 1923 In doing so it allows a full appreciation of Wright s Gill s and Schindler s buildings beyond their experiential qualities

Modernism in Design Paul Greenhalgh, 1997-07-01. Ten new and important essays on design cover Modernism's fortunes in Germany, Italy, Sweden, Britain, Spain, Belgium, and the USA; they range in subject matter from world fairs and everyday domestic objects to American West coast architecture and French and Italian furniture. With essays by Tim Benton, Gillian Naylor, Penny Sparke, Wendy Kaplan, Clive Wainwright, Martin Gaughan, Guy Julier, Mimi Wilms, Julian Holder, and Paul Greenhalgh. The object of this book is to diffuse myths. If modernism has in the past been both absurdly praised and absurdly damned, *Modernism in Design* seeks to lift it out of this cycle and to demonstrate that the modern movement could offer neither Jerusalem nor Babylon. In this, the book succeeds admirably. *Designer's Journal*. While this collection of essays is aimed primarily at design historians and students of design history, hard-pressed practising designers and architects should make room for it on their bookshelves.
