Rethinking Scholarly Communication in China Liu Zhongbo, 2024-09-02 This book examines science and

technology policies in China over time and explores the development of scholarly communication through the lens of the political economy of communication. Despite political censorship and restrictions on the production of academic knowledge in China, the number of scholarly publications has skyrocketed over the past 20 years. By explaining these seemingly contradictory phenomena, this study provides insight into the complex landscape of scholarly communication in China, shaped by the government in collaboration with commercial publishers. The book examines the dynamic relationship between the state and the market, including their key players, which determines the production and dissemination of academic knowledge. From a political economy perspective, it investigates how the academic governance complex, a system that intertwines communication, politics, and economics, has been established in China. It then discusses the impact of this system on the production of academic knowledge in the country. The title will serve as a key reference for academics, researchers, and students interested in the intersection of communication studies, librarianship, and political science, particularly those focusing on China's academic knowledge production and scholarly communication. *University Libraries and Scholarly Communication* Anthony M. Leadership and Management Principles in Libraries in Developing Countries Wei Wei, Sue O'Neill Johnson, 2014-06-11. Learn leadership skills from achievements at special libraries in Asia, Africa, Eastern Europe, and Central America. *Leadership and Management Principles in Libraries in Developing Countries* is a compilation of success stories epitomizing management and leadership strategies from developing nations around the globe. This book focuses on library administrators from Asia, Africa, Eastern Europe, and Central America who have significantly transformed their library services in spite of limited funds and a lack of resources. You'll learn about their achievements, their techniques, and the strengths and skills they used, which can help you become a stronger leader at your own library. *Leadership and Management Principles in Libraries in Developing Countries* is a collection of selected entries to the Special Libraries Association Leadership and Management Division's 2003 International Paper Competition for special librarians in developing countries. Each author describes the effective leadership and management that made their special library initiatives successful, providing references, tables, step-by-step instructions, and handy checklists for other librarians to use. In *Leadership and Management Principles in Libraries in Developing Countries*, library officials discuss the development of successful programs at special libraries, such as the Indian Institute of Technology in Delhi, India, where a team of people with diverse backgrounds worked together to digitally modernize their traditional library; the Agricultural Libraries and Special Libraries in Tropical Biology located in Indonesia, where special librarians found innovative ways to access funding support and expertise from foreign institutions, international relief agencies, and library associations; the Information Resource Centre at The Mildmay Centre in Kampala, Uganda, where the new Mobile Patient Library Services project provides information materials to patients with HIV/AIDS and their caregivers; the American Cultural Center Library, now called the Rosa Parks

Library in Niamey Niger where the library was restructured from a simple reading room into a diverse cultural resource of exhibitions seminars and multilingual reference materials the Federal Ministry of Industry headquarters Library in Nigeria where the library transformation was made possible through good leadership style managerial expertise and effective staff organization the University of Swaziland Libraries in Swaziland where a strategic planning initiative helped the library widen Internet access secure subscription funding for database access and purchase updated equipment to enrich the instructional research and administrative functions of the library This book represents a body of practical experience problems lessons and techniques that can be shared and tried by those who want to know more about or deal with the special needs and circumstances of librarians in developing countries Leadership and Management Principles in Libraries in Developing Countries will show you how to improve both service and outreach to your local community by becoming a leader at your special library whether you are the librarian mid level manager director or information consultant Library science faculty and students will also find that this book illustrates the benefits of good leadership and management

Higher Education in the United States James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community

colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis

Sugimoto,2016-02-22 Scientometrics have become an essential element in the practice and evaluation of science and research including both the evaluation of individuals and national assessment exercises Yet researchers and practitioners in this field have lacked clear theories to guide their work As early as 1981 then

doctoral student Blaise Cronin published The need for a theory of citing a call to arms for the fledgling scientometric community to produce foundational theories upon which the work of the field could be based More than three decades later the time has come to reach out the field again and ask how they have responded to this call This book compiles the foundational theories that guide informetrics and scholarly communication research It is a much needed compilation by leading scholars in the field that gathers together the theories that guide our understanding of authorship citing and impact

Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM
