Medieval Robots E. R. Truitt, 2015-04-22 A thousand years before Isaac Asimov set down his Three Laws of Robotics real and imagined automata appeared in European courts liturgies and literary texts Medieval robots took such forms as talking statues mechanical animals and silent metal guardians some served to entertain or instruct while others performed disciplinary or surveillance functions Various ascribed to artisanal genius inexplicable cosmic forces or demonic powers these marvelous fabrications raised fundamental questions about knowledge nature and divine purpose in the Middle Ages Medieval Robots recovers the forgotten history of fantastical aspirational and terrifying machines that captivated Europe in imagination and reality between the ninth and fourteenth centuries E R Truitt traces the different forms of self moving or self sustaining manufactured objects from their earliest appearances in the Latin West through centuries of mechanical and literary invention Chronicled in romances and song as well as histories and

which a penniless preacher was also the King of Kings and the last were expected to be first twelfth century thinkers brought order to their lives through the creation of opposing categories In a highly original work Constance Brittain Bouchard examines this poorly understood component of twelfth century thought one responsible in her view for the fundamental strangeness of that culture to modern thinking Scholars have long recognized that dialectical reasoning was the basic approach to philosophical legal and theological matters in the high Middle Ages Bouchard argues that this way of thinking and categorizing which she terms a discourse of opposites permeated all aspects of medieval thought She rejects suggestions that it was the result of imprecision and provides evidence that people of that era sought not to reconcile opposing categories but rather to maintain them Bouchard scrutinizes the medieval use of opposites in five broad areas scholasticism romance legal disputes conversion and the construction of gender Drawing on research in a series of previously unedited charters and the earliest glossa manuscripts she demonstrates that this method of constructing reality was a constitutive element of the thought of the period
