School Choice In Chile Two Decades Of Educational Reform Pitt Latin American Series:

School Choice In Chile Varun Gauri, 1999-02-15 School Choice in Chile examines the dramatic educational decentralization and privatization of schools in Chile In the early 1980s the Pinochet regime decentralized schooling providing vouchers for parental choice of public or private schools At the same time the government supposedly gave the administration of schools to local municipalities Although the reform has merit and is defended by some as a major achievement Varun Gauri shows the many ways in which it has not worked In this process of reform neither the administration of schools nor school content was really decentralized from the Ministry of Education nor did students gain equality of educational opportunity or better schooling outcomes These failures of the post welfare model are due partly to Chile's political and economic problems of the era but are also evidence of flaws at its core at least where education is concerned The study presents data for an original survey of 726 households in Greater Santiago that finds more evidence for social and economic stratification among Chilean schools than past analyses have shown Gauri finds that information about school quality a sense of entitlement and the use of specific search techniques increase the odds that a child attends a school with high achievement scores Gauri offers some insights as he supports the criticism that market forces might exacerbate inequalities without necessarily generating clear gains in academic achievement In the new system many parents continued to be ill informed about differences among schools nonacademic factors played a major role in school selection schools appeared to use entrance exams to practice a form of creaming and parental wealth was a strong determinant of whether families were willing and able to take full advantage of choice programs These are extremely timely findings especially in light of the current debate over school choice and vouchers in the United States Because the United States has little experience in school choice School Choice in Chile presents a convincing and necessary report on an almost twenty year old experience with information from which all nations can learn Parents policy analysts in education and social welfare as well as those studying political science public policy and education will find it extremely useful

Examining Educational Policy in

Latin America Axel Rivas, 2021-12-30 This book synthesizes and analyzes the complex map of educational reforms in Latin America in the first two decades of the 21st century The book offers insights into the agendas processes and political economy of educational reforms in Argentina Brazil Chile Colombia Mexico and Peru Written by renowned contributors from each country chapters present systematic critical and reflective accounts of an intense period of education reforms The book fills a gap in educational research and provides a systematic study that compares the cases analyzed The first broad comparative collection of its kind the book is well suited to courses in international and comparative education policy

Contrasting Dynamics in Education Politics of Extremes ,2015-01-01 This book aims to enhance understanding of school choice as a supra national travelling policy explored in two strikingly different societies Latin American Chile and North European Finland Chile was among the first countries to implement school choice as a policy which it did comprehensively in the early 1980s through the creation of a market environment Finland introduced parental choice of a school on a very moderate scale and without the market elements in the mid 1990s Predominant aspects of Chilean basic schooling include provision by for profit and non profit private and municipal organisations voucher system parental co payment and ranking lists Finland persists in keeping education under public authority governance and free of charge and in prohibiting profit making and rankings The wide range of sociologists of education contributing to this book offer novel analyses and perspectives on the operation of school choice in Chile the trailblazer and Finland the European PISA leader Agn s van Zanten s description of how school choice operates as a major dimension of social reproduction sets the scene After that Chilean and Finnish authors explore how the policy is displayed and used explicitly for very different societal purposes although implicitly following similar patterns in the two countries with their histories politics and cultures Empirically the focus is on how families view and act on school choice The research material includes large surveys interviews and ethnographic data gathered in urban Chile and Finland Capitalising on the concept of dynamics the book concludes with some insights into how this globally travelling education policy has materialised in two apparently dissimilar societies and their localities

Is There Real Freedom of School Choice? Mauro Mediavilla, Adrián Zancajo, 2015
