## **Long Postwar Peace:**

*Great Powers and World Order* Charles W. Kegley, Gregory A. Raymond, 2020-02-12 *Great Powers and World Order* encourages critical thinking about the nature of world order by presenting the historical information and theoretical concepts needed to make projections about the global future Charles W. Kegley and Gregory Raymond ask students to compare retrospective cases and formulate their own hypotheses about not only the causes of war but also the consequences of peace settlements Historical case studies open a window to see what strategies for constructing world order were tried before why one course of action was chosen over another and how things turned out By moving back and forth in each case study between history and theory rather than treating them as separate topics the authors hope to situate the assumptions causal claims and policy prescriptions of different schools of thought within the temporal domains in which they took root giving the reader a better sense of why policy makers embraced a particular view of world order instead of an alternative vision

**The Waning of Major War** Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes

large The result is a lively collection of essays by authors who often disagree but who nonetheless provide the reader with keen insights about the past and provocative views of the future

The War Puzzle Revisited John A. Vasquez, 2009-07-23 John A Vasquez's *The War Puzzle* provided one of the most important scientific analyses of the causes of war of the last two decades *The War Puzzle Revisited* updates and extends his groundbreaking work reviewing research on the onset and expansion of war and the conditions of peace Vasquez describes systematically those factors associated with wars to see if there is a pattern that suggests why war occurs and how it might be avoided delineating the typical path by which relatively equal states have become embroiled in wars in the modern global system The book uses the large number of empirical findings generated as the basis of its theorizing and integrates these research findings so as to advance the scientific knowledge of war and peace

**War in a Changing World** Zeev Maoz, Azar Gat, 2001 Essays tracing the changing nature of war in relation to global and regional changes

Point of Attack John Yoo, 2014-03-25 The world today is overwhelmed by wars between nations and within nations wars that have dominated American politics for quite some time *Point of Attack* calls for a new understanding of the grounds for war In this book John Yoo argues that the new threats to international security come not from war between the great powers but from the internal collapse of states terrorist groups the spread of weapons of mass destruction and destabilizing regional powers In *Point of Attack* he rejects the widely accepted framework built on the U N Charter and replaces it with a new system consisting of defensive pre-emptive or preventive measures to encourage wars that advance global welfare Yoo concludes with an analysis of the Afghanistan and Iraq wars failed states and the current challenges posed by Libya Syria North Korea and Iran

*The Future's Back* Frank P. Harvey, 1997 Arguing that previous critiques of rational choice and deterrence theory are not convincing Frank Harvey constructs a new set of empirical tests of rational deterrence theory to illuminate patterns of interaction between rival nuclear powers He analyses the crisis management techniques used by the United States and the Soviet Union in twenty eight post war crises and isolates factors that promote or inhibit escalation of these crises This crises based data set serves as the basis for identifying patterns of response when one nuclear state is threatened by another *The Future's Back* offers new directions for testing that emphasize a more unified approach to theory building and assesses the feasibility of alternative courses of action to prevent escalation of future disputes characterized by nuclear rivalry

*Paradigm Lost?* David Jablonsky, 1993 Sometime in the penultimate decade of the 20th century the United States and its allies won the cold war Once again in the current transition period the primary questions revolve around the management of power and America's role in global politics Once again there are the issues of change and continuity In terms of change the cold war set in train a blend of integrative and disintegrative forces and trends that are adding to the complex tensions of the current transition

The integrative force that increasingly linked global economies in the cold war for instance also holds out the spectral potential of global depression or at the very least nations more susceptible to disintegrative actions as the Iraqi invasion of Kuwait demonstrated In a similar manner the advances in communications and transportation that have spread the results of medical and scientific discoveries around the world are countered by the malign transnational results of nuclear technology the drug trade terrorism AIDS and global warming

The Scourge of War Paul Diehl, 2010-03-25 J David Singer's legendary Correlates of War project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so called democratic peace Editor Paul F Diehl has now convened some of the world's foremost international conflict analysis specialists to reassess COW's contribution to our understanding of global conflict Each chapter takes one of COW's pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field The result is a critical retrospective that will reintroduce Singer's important and still provocative findings to a new generation of students and specialists Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign

Vasquez, 1993-05-06 This book constructs a new scientific explanation of the onset and expansion of war and the conditions of peace The author describes systematically those factors common to wars between equal states to see if there is a pattern that suggests why war occurs and how it might be avoided or mitigated delineating the typical path by which relatively equal states have become embroiled in wars with one another in the modern global system Emphasis is placed on the issues that give rise to war and how the practices of power politics lead to a series of steps that produce war rather than peace The book differs from others in that it employs the large number of empirical findings generated in the last twenty five years as the basis of its theorizing and integrates these research findings so as to advance dramatically the scientific knowledge of war and peace

*The Military In New Times* James Burk, Robert J Waldman, David R Segal, Charles C Moskos, 2019-06-26 What role will armed forces play in a world that is turbulent yet no longer organized by the bipolar conflict of East and West In this volume leading experts from several disciplines assess the rapidly changing global strategic and cultural landscape examining how it will affect the responsibilities and social standing of the modern military There are provocative disagreements among the contributors especially over whether we should expect and prepare for another global war However the contributors generally agree on several broad themes that guide their analysis Arguing that the Cold War has masked basic trends that have been reshaping the international system for a long time they suggest that the sovereign states dominance of the international system is rapidly coming to an end as multinational ethnic regional and religious groups to name a few increasingly affect the course of global affairs In the absence of a clear enemy the military faces an identity crisis In the postmodern atmosphere of this multicentric global order authority is fragmented and the exercise of any one authority is subject to greater scrutiny and challenge The military has become more accepting of a variety of values life styles and attitudes toward its tasks At the same

time support for the military's mission is difficult to win requiring endless justification The authors believe that the principal missions for the military in these new times are peacekeeping peacemaking and humanitarian assistance They examine the prospects for successful operations in these areas taking into account the cultural lag between world structures that favor increased multinational peacekeeping forces and individual nations that supply token resources to support such efforts This volume provides a sophisticated and thought provoking perspective on the future role of the military in the coming decades It is sure to enrich the vigorous debate surrounding these issues

**Cold War Statesmen Confront the Bomb** John

Gaddis, Philip Gordon, Ernest May, Jonathan Rosenberg, 1999-04-01 Cold War Statesmen Confront the Bomb Nuclear Diplomacy Since 1945 is a path breaking work that uses biographical techniques to test one of the most important and widely debated questions in international politics Did the advent of the nuclear bomb prevent the Third World War Many scholars and much conventional wisdom assumes that nuclear deterrence has prevented major power war since the end of the Second World War this remains a principal tenet of US strategic policy today Others challenge this assumption and argue that major war would have been obsolete even without the bomb This book tests these propositions by examining the careers of ten leading Cold War statesmen Harry S Truman John Foster Dulles Dwight D Eisenhower John F Kennedy Josef Stalin Nikita Krushchev Mao Zedong Winston Churchill Charles De Gaulle and Konrad Adenauer and asking whether they viewed war and its acceptability differently after the advent of the bomb The book's authors argue almost unanimously that nuclear weapons did have a significant effect on the thinking of these leading statesmen of the nuclear age but a dissenting epilogue from John Mueller challenges this thesis

*Nuclear Weapons and Conflict Transformation* Saira Khan, 2008-09-09 This new volume explores what the acquisition of nuclear weapons means for the life of a protracted conflict using the case study of the conflict between India and Pakistan
