Positive Horses Patti Dammier PhD, 2019-09-25 Horse training isn't a mystical procedure In fact there isn't mystery in the methods necessary to teach any skill To learn any skill there is a logical sequence that if adhered to allows a behavior to be taught and learned Creating a Positive Horse consists of using positive methods which in turn creates a positive attitude *Positive Horses* explains those positive methods necessary to create horses that perform on taught learned cues both on the ground and in the saddle that are systematically rewarded but also have an extremely positive attitude to their trainer companion The system uses the method Behavior Modification This book is about Explanation of basic educational methods using systematic sequences that support training horses Creating the goals and objectives for each individual horse rather than a one size fits all approach Training using positive reinforcement how food rewards creates useable cues instead of the trainer performing

meaningless behavior that the horse doesn't understand. Horses learning basic cues come stand, walk on, and halt, which provides safety on the ground and assists in the next work in the saddle. Applying basic training to other equestrian disciplines. Addressing training method failure because the trainer doesn't assess the correct behavior to reward and doesn't understand the methods. Horse case studies exemplifying the use of behavioral methods.

Academic Equitation
General Decarpentry, 2012-07-12 Originally written and published in 1949, *Academic Equitation* was considered by dressage experts to be the most important contribution to classical training in the twentieth century. This book was intended as a preparation for international dressage competitions but is far more than this. It discusses the subjects of academic equitation, the riding master, and the choice of horse before introducing the reader to the author's systematic program covering the very early training right up to the most advanced movements. The appendix deals with lungeing work in hand, long reins, and pillar work. General Decarpentry was not only a distinguished scholar of artistic equitation but also equally versed in putting the theories into practice. He deals with the education of the young horse and the complications and details of advanced schooling with the hand of a master. Although he claims that nothing in the book is his, his training system is based on the methods of D. Aure Baucher and L. Hotte. The General's wisdom and deep knowledge are manifest throughout. It was the General's great wish that traditional teachings on the art of equitation should not be lost to those who wished to study equitation. In this most important work, he has succeeded in presenting these teachings in such a way that allows both layman and expert to obtain a deeper insight into this fascinating subject.
