Citizenship Through Secondary Geography David Lambert, Paul Machon, 2004-01-14 This book reveals the potential of geography to engage with citizenship It provides theoretical signposts in the form of short digestible explanations for key ideas such as racism values identity community and social exclusion a number of inset activities for further thinking a critique of the discipline and the pitfalls to avoid in teaching citizenship through geography practical teaching suggestions All the contributions to this valuable book point to the capacity of geography to engage with citizenship values education and people environment decision making on scales that range from the local to the global It offers positive and direct ways to become involved in the thinking that must underpin any worthwhile citizenship education for all experienced teachers student teachers heads of department curriculum managers principals and policy makers

Learning to Teach Geography in the Secondary School David Lambert, David Balderstone, 2012-08-21 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography It helps them acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and creative lessons This fully revised and updated second edition takes account of new legislation and important developments in geography education including literacy numeracy citizenship and GIS Brand new chapters in this edition provide essential guidance on fieldwork and using ICT in the context of geography teaching and learning Chapters on teaching strategies learning styles and assessment place the learner at the centre stage and direct advice and activities encourage successful practice Designed for use as a core textbook Learning to Teach Geography in the Secondary School is essential reading for all student teachers of geography who aspire to become effective reflective teachers Praise for the first edition of Learning to Teach Geography in the Secondary School This is a practical and visionary book as well as being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully worked out authoritative conceptual framework The Times Educational Supplement This is a modern powerful relevant and comprehensive work that is likely to become a standard reference for many beginning teachers on geography initial teacher training courses in England and Wales Educational Review

Teaching Secondary Geography Malcolm McInerney, Susan Caldis, Stephen Cranby, John Butler, Alaric Maude, Susanne Jones, Michael Patrick Law, Rebecca Nicholas, 2022-03-03 Geography is not only the study of the surface of the planet and the exploration of spatial and human environment relationships but also a way of thinking about the world Guided by the Australian Curriculum and

the Professional Standards for Teaching School Geography GEOstandards Teaching Secondary Geography provides a comprehensive introduction to both the theory and practice of teaching Geography This text covers fundamental geographical knowledge and skills such as working with data graphicacy fieldwork and spatial technology and provides practical guidance on teaching them in the classroom Each chapter features short answer and Pause and Think questions to enhance understanding of key concepts and Bringing It Together review questions to consolidate learning Classroom scenarios and a range of information boxes are provided throughout to connect students to additional material Written by an author team with extensive teaching experience Teaching Secondary Geography is an exemplary resource for pre service teachers

Learning to Teach Geography in the Secondary School Mary Biddulph, David Lambert, David Balderstone, 2015-05-20 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography It helps you acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and challenging lessons It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education the new edition considers the current debates around what we mean by geographical knowledge and what s involved in studying at Masters level Key chapters explore the fundamentals of teaching and learning geography Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school based initial teacher education in mind Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective reflective teachers Praise for previous editions of Learning to Teach Geography in the Secondary School This is a practical and visionary book as well as being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully worked out authoritative conceptual framework The Times Educational Supplement This is a modern powerful relevant and comprehensive work a standard reference for many beginning teachers on geography initial teacher training courses Educational Review

Continuum Guide to Geography Education Graham Butt, 2010-07-15 A reference guide to geography education Entries arranged alphabetically cover government legislation and reports famous geography educators resources research findings movements trends debates and issues organizations and key concepts An analytical index helps the reader to choose paths through the book connecting entries

Aspects of Teaching Secondary Geography Margaret Smith, 2003-09-02 This book provides a practical

illustration of the skills knowledge and understanding required to teach in the secondary classroom As well as discussing concepts and ideas the book gives a critical examination of some of the key issues and will encourage the reader to engage with the ideas and consider their views and beliefs It is an invaluable resource for those who are learning to teach or for those teachers who wish to reflect on their teaching practice *Global Perspectives in the Geography Curriculum* Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish's book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself *Understanding GCSE Geography* Ann Bowen, John Pallister, 2002 This Foundation book has simplified text covering the same material as the core student book with the same pagination Written to AQA A specification it encourages the development of geographical skills There are activity and test questions and guidance for students on tackling coursework *Geography of Education* Colin Brock, 2016-09-22 *Geography of Education* sets out the scope of this emergent interdisciplinary field It illustrates the essential affinity of geographical and educational studies by emphasising the geographical factors influencing formal education systems and other forms of knowledge transfer Colin Brock begins by arguing the theoretical synergy that exists

between the nature of both geography and educational studies as disciplines This is then exemplified by an analysis of the emergence of systems of schooling under the influence of religious political and economic forces The author also considers informal and non formal modes of education and argues that the huge diversity of such provision creates a rich resource for research into geographies of education In the final chapters the author turns his attention to the role of cyberspace which has its own geography in learning and considers education as a form of humanitarian response to issues of environmental sustainability By bringing together a wide range of themes and topics relating to both education and geography Colin Brock argues that the geographical approach should inform the evolution of all types of educational provision around the world

Geography John Morgan, David Lambert, 2005-06-21 When Geography specialists decide they want to teach it can be a daunting prospect to enter a real classroom no matter how much subject knowledge they already possess Geography Teaching School Subjects 11 19 puts the subject into perspective and shows new teachers and student teachers how to make Geography accessible and interesting for their pupils Divided into three sections the book examines the theory and practice of teaching geography section one explores how teachers can frame their own knowledge for classroom practice section two focuses on Geography in the classroom and curriculum development as well as aspects of pedagogy and lesson design evaluation and assessment section three focuses on the teachers themselves and how they can view and work on professional development within their own subject area

Debates in Geography Education Mark Jones, David Lambert, 2017-09-07

Debates in Geography Education encourages early career teachers experienced teachers and teacher educators to engage with and reflect on key issues concepts and debates It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding The second edition is fully updated in light of the latest research policy and practice in the field as well as key changes to the curriculum and examination specifications Expert contributors provide a range of perspectives on international historical and policy contexts in order to deepen our understanding of significant debates in geography education Key debates include geography's identity as an academic discipline what constitutes knowledge in geography places and regional geography what it means to think geographically constructing the curriculum how we link assessment to making progress in geography the contribution of fieldwork and outdoor experiences technology and the use of Geographical Information school geography and employability understanding the gap between school and university geography evidence based practice and research in geography education The comprehensive rigorous coverage of these key issues together with carefully annotated selected further reading will help support and shape further research and writing *Debates in Geography Education* is a key resource that is essential reading for all teachers and researchers who wish to extend their grasp of the place of geography in education Mark Jones is Senior Lecturer in Education at the University of the West of England Bristol UK David Lambert is Professor of Geography Education at UCL Institute of Education London UK

Geographical Education in a Changing World John Lidstone, Michael Williams, 2006-07-19 This book results from the work

of the Commission on Geographical Education of the International Geographical Union Part 1 focuses on the distinctive traditions of school geography Part 2 reviews the state of school geography on a broad continental basis including national case studies by local experts The final chapters extrapolate from the present and point to likely future developments in the subject again with examples drawn from various countries **Indian Geography in the 21st Century** Ravi S.

Singh,2009-10-02 This book primarily a collection of statements on action agenda to be pursued in geography in India consists of nineteen chapters exclusively authored by the young geographers It is organised into five parts Part I provides The Contextual Orientation Part II contemplates on Reshaping Geography Education Part III explores Resurrecting Physical Geography Part IV looks at Retrieving Human Geography and Part V The Summum Bonum attempts to garland the emerging thoughts The book seeks to provide a peep into the future Indian Geography and serve professional geographers researchers teachers and students alike **Primary School Geography (1994)** Bill Marsden,Jo Hughes,2019-07-24 Published in 1994

this book is the result of the collaborative work undertaken at the Liverpool based Geography INSET Primary Project GIPP over three years It presents a series of chapters for primary teachers seeking to implement the Statutory Orders for Geography in the National Curriculum Steering a middle course between the sophistications of a theoretical methodological text and the over simplifications of a tips for teachers approach the authors highlight the positive opportunities offered by the National Curriculum At the same time they are critical of many aspects of the Statutory Orders without losing sight of their objective to help teachers to improve the quality of primary geography teaching The book is especially useful for INSET work for teachers who have already grappled with National Curriculum Geography and who will be adjusting to the post Dearing rearrangements **Key Thinkers on Space and Place** Mary Gilmartin,Phil Hubbard,Rob Kitchin,Sue Roberts,2024-05-11

Space and place are at the heart of how geographers and sociologists think This updated edition of the essential undergraduate text will introduce you to the most influential thinkers in the tradition of social theory with a new focus on the past fifty years This book is designed to engage with theoretical debates in human geography through the individuals who have made the most significant contributions to this field This will show you how ideas are shaped by contexts and how those ideas in turn effect change This book shows how theoretical understandings evolve shift and change It also highlights the connections between different thinkers whose ideas are developed in collaboration with or in reaction to others Spatial thought is never developed in a vacuum but is always constructed by individuals and groups of people located in particular institutional and social structures with their own sets of personal and political beliefs The biographical approach of this book reveals how individual thinkers draw on a rich legacy of ideas from past and contemporary generations With increased coverage of international and female thinkers as well as those who work against Eurocentric notions of space and place this book reveals the exciting reorientation of Geography towards new ideas and methods in the last decade Each entry contextualises its subject within on going inter disciplinary debates and important political moments as well as highlighting

connections between different thinkers Together the chapters uncover the rich and diverse evolution of social theory equipping you with the foundational ideas of geographical thought Each entry offers the following components i a short biography ii an explanation of ideas iii an exploration of how their ideas have been used and critiqued iv a selective bibliography of key publications and key publications which review or critique *Applied Geography* Michael Pacione,2002-03-11 *Applied Geography* offers an invaluable introduction to useful research in physical environmental and human geography and provides a new focus and reference point for investigating and understanding problem orientated research Forty nine leading experts in the field introduce and explore research which crosses the traditional boundary between physical and human geography A wide range of key issues and contemporary debates are within the books main sections which cover natural and environmental hazards environmental change and management challenges of the human environment techniques of spatial analysis *Applied geography* is the application of geographic knowledge and skills to identify the nature and causes of social economic and environmental problems and inform policies which lead to their resolution *Learning to Teach History in the Secondary School* Terry Haydn,Alison Stephen,James Arthur,Martin Hunt,2014-10-10 An excellent companion to *Learning to Teach in Secondary School* full of good ideas and better advice Mentors will certainly want to use it and so I m sure will the rest of the history department Make sure they buy one and keep your copy under lock and key Michael Duffy Times Educational Supplement A very well written and readable book Overall this is an excellent book and one which students and teachers outwith England would find a valuable addition to their library Scottish Association of Teachers of History Resources Review This book is without question the standard text for the history PGCE market Dr Ian Davies University of York on the first edition *Learning to Teach History in the Secondary School* provides an accessible introduction to teaching and learning history at secondary level Underpinned by a theoretical perspective and backed up by the latest research it encourages student teachers to develop a personal approach to teaching history This fourth edition has been thoroughly updated for the new curriculum with a brand new chapter on subject knowledge and a new section on action research to better support those reflecting on and developing their own practice It provides an array of references and materials that give a sound theoretical foundation for the teaching of history including weblinks to further resources while a range of tasks will enable students to put their learning into practice in the classroom Practical advice is combined with reference and access to a wide range of recent and relevant research in the field of history education to support Masters Level research and aid reflective practice Key issues covered include The benefits of learning history Planning The use of language and strategies for teaching Inclusion Technology in history teaching Assessment Continuing professional development Offering comprehensive and accessible support to becoming a history teacher this book remains an invaluable resource for all training and newly qualified history teachers *Australian Books in Print 1999* K G Saur Books,1999-04 Excellent coverage essential to worldwide bibliographic coverage *American Reference Books Annual*

This comprehensive reference provides current finding ordering information on more than 123 000 in print books published in Australia You ll also find brief profiles of more than 12 000 publishers distributors whose titles are represented as well as information on trade associations local agents of overseas publishers literary awards more From Thorpe
