being used His later work included the detection of atmospheric neutrinos which was a forerunner to the discovery of neutrino oscillations the ability of neutrinos to change from one type to another This finding was a significant step to other experiments that aim to answer profound questions about the nature of the universe including why it is composed of matter Takaaki Kajita Nobel Laureate in Physics Neutrino Researcher University of Tokyo Cole has provided a compelling personal and scientific account of a remarkable pioneer in Neutrino Physics Arthur B McDonald Nobel Laureate in Physics Director of the Sudbury Neutrino Observatory Professor Queen's University Ontario Canada
