Understanding Religion Through Artificial Intelligence Justin E. Lane, 2021-05-06 In Understanding Religion through Artificial Intelligence Justin E Lane looks at the reasons why humans feel they are part of a religious group despite often being removed from other group members by vast distances or multiple generations To achieve this Lane offers a new perspective that integrates religious studies with psychology anthropology and data science as well as with research at the forefront of Artificial Intelligence AI After providing a critical analysis of approaches to religion and social cohesion Lane proposes a new model for religious studies which he calls the Information Identity System This model focuses on the idea of conceptual ties links between an individual s self concept and the ancient beliefs of their religious group Lane explores this idea through real world examples ranging from the rise in global Pentecostalism to religious extremism and self radicalization to the effect of 9 11 on sermons Lane uses this lens to show how we can understand religion and culture today and how we can better contextualize the changes we see in the social world around us **Atlas of Religion in China: Social and Geographical Contexts** Fenggang Yang, 2018-09-04 The speed and the scale with which traditional religions in China have been revived and new spiritual movements have emerged in recent decades make it difficult for scholars to stay up to date on the religious transformations within Chinese society This unique atlas presents a bird s eye view of the religious landscape in China today In more than 150 full color maps and six different case studies it maps the officially registered venues of China's major religions Buddhism Christianity Protestant and Catholic Daoism and Islam at the national provincial and county levels The atlas also outlines the contours of Confucianism folk religion and the Mao cult Further it describes the main organizations beliefs and rituals of China's main religions as well as the social and demographic characteristics of their respective believers Putting multiple religions side by side in their contexts this atlas deploys the latest qualitative quantitative and spatial data acquired from censuses surveys and fieldwork to offer a definitive overview of religion in contemporary China An essential resource for all scholars and students of religion and society in China Urban Reliaion Jörg Rüpke, 2020-02-24 So far religion has been seen as cause for dramatic developments in the history of cities it has contributed to the monumentalisation of centres and or has given importance to ex centric places Very recently anthropologists have been discovering religion in the contemporary global city But still awaiting historical investigation is the specific urban character of religious ideas practices and institutions and the role of urban space shaping this very religion in the course of history The time span from the Hellenistic age to Late Antiquity was crucial in the establishment of concepts and institutions of religion and witnessed extended waves of urbanisation Rome being central to this In addressing this problem this book fills a significant gap in the scholarship on urban religion across time Taking seriously the proposition that space is condition medium and outcome of social relations the development of urban religion in lived urban space and urban culture or urbanity offers a lens onto processes of religious change that have been neglected for the history of religion and for the study of urbanism The key thesis is that city space engineered the major changes that revolutionised religions This

stimulating book makes use of archaeology and history to address religion as an essential component of urban life in both the past and the present With a strong basis in the ancient Mediterranean as well as an insightful view of modern urban life R pke emphasizes that the practice and performance of religion at the everyday level is as essential in the creation of an urban ethos as the grand temples and institutions promulgated by the elite Monica L Smith author of Cities The First 6 000 Years J rg R pke offers a characteristically original and learned series of reflections on some of the many ways in which the history of religions and the history of cities might be entangled Urban Religion offers no single overarching thesis but it is consistently thought provoking and suggests many intriguing lines of investigation for the future Greg Woolf Institute of Classical Studies Islamic Modernism and the Re-Enchantment of the Sacred in the Age of History Monica M.
