Love Is Not Enough The Treatment Of Emotionally Disturbed Children:

Love is Not Enough Bruno Bettelheim, 1968 *Encyclopedia of Special Education* Cecil R. Reynolds, Elaine Fletcher-Janzen, 2007-01-02 Offers a thoroughly revised comprehensive A to Z compilation of authoritative information on the education of those with special needs *Emotionally Disturbed* Deborah Blythe Doroshow, 2019-04-26 Before the 1940s children in the United States with severe emotional difficulties would have had few options for care The first option was usually a child guidance clinic within the community but they might also have been placed in a state mental hospital or asylum an institution for the so called feeble minded or a training school for delinquent children Starting in the 1930s however more specialized institutions began to open all over the country Staff members at these residential treatment centers shared a commitment to helping children who could not be managed at home They adopted an integrated approach to treatment employing talk therapy schooling and other activities in the context of a therapeutic environment Emotionally Disturbed is the first work to examine not only the history of residential treatment but also the history of seriously mentally ill children in the United States As residential treatment centers emerged as new spaces with a fresh therapeutic perspective a new kind of person became visible the emotionally disturbed child Residential treatment centers and the people who worked there built physical and conceptual structures that identified a population of children who were alike in distinctive ways Emotional disturbance became a diagnosis a policy problem and a statement about the troubled state of postwar society But in the late twentieth century Americans went from pouring private and public funds into the care of troubled children to abandoning them almost completely Charting the decline of residential treatment centers in favor of domestic care based models in the 1980s and 1990s this history is a must read for those wishing to understand how our current child mental health system came to be *When Love Is Not Enough* Donna Piazza, PHD, 2014-05-22 When Love Is Not Enough relates how a multitude of factors the competence of staff the safety nurturing and protective elements of the emotional physical and political setting and all overt and covert organizational dynamics determine whether or not a treatment setting accomplishes its therapeutic aims Authors in When Love Is Not Enough continue the emphasis on the group as a whole Group Relation model of organizational and group processes begun with Wilfred Bion's work at the Tavistock Clinic in London in the 1940s This model helps those providing services to children and adolescents evaluate their treatment programs and make the necessary changes toward improvement Chapters in When Love Is Not Enough are dedicated to improving the psychological treatment of children and adolescents in postmodern society a society in which life in interdependent communities is becoming increasingly important for the health and survival of all persons Topics covered include the Tavistock approach to understanding group and organizational behavior the emphasis on group as a whole in problem solving and treatment design narrowing the gap between plan and outcome the dynamics involved in the psychiatric treatment of children issues of staff selection training and development in programs designed to treat children countertransference responses in the treatment of

children and adolescents revitalizing organizations the subjective experience of school life

When Love Is Not Enough helps organizations realize the ways in which they may inadvertently undermine the emotional and cognitive functioning of the staff or the identified patients and set serious limits on the growth of members of the organization staff and patients alike It urges organizations to conduct an ongoing self scrutiny concerning their rational and irrational processes as this self examination is crucial to the health and vitality of the treatment offered to others The book also promotes thinking of the conscious and unconscious dynamics of the group as a whole to more completely inform organizational decisions concerning changes that may enhance the treatment of children and adolescents **When Love Is Not Enough** serves as an invaluable guide for mental health professionals who treat children and adolescents group therapists hospital and clinic administrators psychoanalysts nurses social workers psychologists and psychiatrists

Lacan on Love Bruce Fink, 2015-12-09 Quintessentially fascinating love intrigues and perplexes us and drives much of what we do in life As wary as we may be of its illusions and disappointments many of us fall blindly into its traps and become ensnared time and again Deliriously mad excitement turns to disenchantment if not deadening repetition and we wonder how we shall ever break out of this vicious cycle Can psychoanalysis with ample assistance from philosophers poets novelists and songwriters give us a new perspective on the wellsprings and course of love Can it help us fathom how and why we are often looking for love in all the wrong places and are fundamentally confused about what love really is In this lively and wide ranging exploration of love

who fully understand maladaptive patterns without being able to change them attests has dogged psychoanalysis for a century Building on the integrative object relations model set forth in *Transcending the Self* 1999 Frank Summers turns to Winnicott's notion of potential space in order to elaborate a fresh clinical approach for transforming insight into new ways of being and relating For Summers understanding occurs within transference space but the latter must be translated into potential space if insight is to give rise to change in the world outside the consulting room Within potential space Summers holds the analyst's task shifts from understanding the present to aiding and abetting the patient in creating a new future This means that the analyst must draw on her hard won understanding of the patient to construct a vision of who the patient can become Lasting therapeutic change grows out of the analyst's and patient's collaboration in developing new possibilities of being that draw on the patient's affective predispositions and buried aspects of self In the second half of the book Summers applies this model of therapeutic action to common clinical syndromes revolving around depression narcissistic injuries somatic symptoms and internalized bad objects Here we find vivid documentation of specific clinical strategies in which the therapeutic use of potential space gives rise to new ways of being and relating which in turn anchor the creation of a new sense of self
