Love and Other Emotions Jason W. Brown,2018-03-08 This book is an account of the psychology of romantic love in the context of a theory of emotions The account develops out of studies in brain psychology and the extension to topics in process philosophy such as the nature of value and belief and the central role of feeling in mental process The approach is subjectivist that is from the internal standpoint and in this respect it differs greatly from the externalist and objectivist trends in modern cognitive science and empiricist philosophy Love is the ultimate in value so that a theory of love is also a theory of the nature of value and its relation to feeling belief and to drive and desire The role of intention reason and appraisal is critiqued The relation to other feelings such as jealousy envy anger loss and grief is discussed in terms of a general theory of emotion and the basis in a process account of the mind brain state Ars Interpres: An International Journal of Poetry, Translation and Art: No. 1 , **The Cambridge History of Classical Literature** E. J. Kenney,W. V. Clausen,1983 *Process and the Authentic Life* Jason W. Brown,2013-05-02 The thesis advanced in this book is that feeling and cognition actualize through a process that originates in older brain formations and develops outward through limbic and cortical fields through the self concept and private space into as the world An iteration of this transition deposits acts objects feelings and utterances Value is a mode of conceptual feeling that depends on the dominant phase in this transition from desire through interest to object worth Among the topics covered are subjective time and change the epochal nature of objects and their temporal extensibility and the evolution of value from inorganic matter into organic form The theory of microgenesis informs this work According to this theory acts and objects evolve in milliseconds through phases that replicate patterns in forebrain evolution The progression in the actualization of the mind brain state is from archaic to recent in brain formation from unity to diversity from past to present and from mind to world An account is given of the diversity of felt experience avoiding the reductionist moves characteristic of biological materialism and the inherent dualism of psychoanalytic and related theories This book is intended for any reader interested in the psychology of the inner life and philosophy of mind including philosophers psychologists psychiatrists and others with an interest in problems of value and moral feeling *Famous Works of Art—And How They Got That Way* John Nici,2015-09-17 In a world filled with great museums and great paintings Leonardo da Vinci s Mona Lisa is the reigning queen Her portrait rules over a carefully designed salon one that was made especially for her in a museum that may seem intended for no other purpose than to showcase her virtues What has made this portrait so renowned commanding such adoration And what of other works of art that continue to enthrall spectators What makes the Great Sphinx so great Why do iterations of The

Scream and American Gothic permeate nearly all aspects of popular culture Is it because of the mastery of the artists who created them Or can something else account for their popularity In *Famous Works of Art And How They Got That Way* John B Nici looks at twenty well known paintings sculptures and photographs that have left lasting impressions on the general public As Nici notes there are many reasons why works of art become famous few have anything to do with quality The author explains why the reputations of some creations have grown over the years some disproportionate to their artistic value Written in a style that is both entertaining and informative this book explains how fame is achieved and ultimately how a work either retains that fame or passes from the public consciousness From ancient artifacts to a can of soup this book raises the question Did the talent to promote and publicize a work exceed the skills employed to create that object of worship Or are some masterpieces truly worth the admiration they receive The creations covered in this book include the Tomb of Tutankhamun Botticelli's Birth of Venus Raphael's Sistine Madonna El Greco's The Burial of Count Orgaz Rodin's The Thinker Van Gogh's Starry Night and Picasso's Guernica Featuring more than sixty images including color reproductions *Famous Works of Art And How They Got That Way* will appeal to anyone who has ever wondered if a great painting sculpture or photograph really deserves to be called great
