Barreto, Graham McGeoch, Wanderley Pereira da Rosa, 2024-10-22 World Christianity and Ecological Theologies invites scholars in religious studies and theology from different continents and contexts to a North South dialogue on environmental ethics political ecology and ecofeminism Throughout the global pandemic the connection between environmental rapacity religion and political interests has once again called scholarly attention to the important conversation on public religion and global environment related issues Acknowledging a deficit among scholars of World Christianity in addressing environmental concerns and the field s limited language for framing those concerns this book aims to bring the fields of study of World Christianity religion and ecology into a sustained conversation with the goal of expanding the theoretical horizons of these fields World Christianity and Ecological Theologies reiterates that all Christian theologies are contextual as they shape and are shaped by specific historical and cultural circumstances It aims at showcasing the ways in which the intersection of religion and ecology is approached by scholars in religious studies and theology in the Global South or by those in conversation with them in the Global North pointing to what can be generated if these bodies of scholarship are engaged as dialogue partners to investigate new patterns of religious environmentalism *Science and Science Teaching* Sharon Sherman, Sharon J. threats posed by economic activities to global life support systems such as the atmospheric ozone layer's protection against ultraviolet radiation and the carbon cycle's provision of climate stability. Human economic activities are now threatening these natural systems at both the local and global levels for the first time in the history of the planet. Scale problems are caused by the physical size of the global economy, the sheer volume and toxicity of the mass of physical materials that are moved or transformed in normal economic production cycles are disrupting the ecosystems that provide global life support services. The physical size of the global economy continues to expand as economic growth is encouraged and facilitated by trade and other government policies at all levels. A variety of approaches to solving scale problems exist. Many have been implemented or are being tested in various countries and communities around the world. Because of the complex nature of scale issues, solutions are being explored via innovative economic and business ideas, creative public policy initiatives, sustainable technologies, and inspiring human values. Mother nature is continually affected by problems which are inadequately addressed by decision makers, whether they are representatives of government, deep states, businessmen, civil society influencers. The aim is to keep interest alive and continue to make generations aware to disseminate information and follow day by day which options and solutions are within everyone's reach. Christianity and Ecological Theology E. M. Conradie, 2006-10-01. There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so. These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology. The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa. **Resources in Education**, 1995
