

Texas Home Vegetable Gardening Guide

Joseph Masabni*

Home gardening continues to grow in popularity. One of every three families does some type of home gardening, according to conservative estimates, with most gardens located in urban areas. Texas gardeners can produce tasty, nutritious vegetables year-round. To be a successful gardener you will need to follow a few basic rules and make practical decisions.

Garden Site

Although many urban gardeners have little choice, selecting a garden site is extremely important. The ideal garden area gets full or nearly full sunlight and has deep, well-drained, fertile soil. The garden should be near a water outlet but not close to competing shrubs or trees. However, if you modify certain cultural practices and select the right crops, almost any site can become a highly productive garden.

Crop Selection

One of the first things you must do is decide what vegetables to grow. Table 1 lists crops suitable for small and large gardens. You will want to grow vegetables that return a good portion of nutritious food for the time and space they require. Vine crops such as watermelons, cantaloupes, winter squash and cucumbers need large amounts of space, but if you plant them near a fence or trellis you may need less space for vine crops. Plant the vegetables your family will enjoy most. Resist the urge to plant more of any particular vegetable than you need unless you plan to preserve the surplus.

[How to Make a Vegetable Garden](#) Edith Loring Fullerton,2015-06-16 Excerpt from How to Make a Vegetable Garden A Practical and Suggestive Manual for the Home Garden While sitting in front of our dear old fireplace at dusk one autumn day with our two girls at my knee they begged for a story I told them how the great apple log glowing and crackling before us had once been a small tree and how it had grown taller each year until its head was higher than the house and its branches were laden with fruit But it grew too old at last to bear well so it had to be cut down to make room for younger trees Its work was not done however Just now it is giving us warmth and making the room glow with light Then its white ashes will be spread about the rose bushes and next year they will have become part of a beautiful blossom A look of wonder at the revelation of Nature s perpetuation came into the deep blue eyes Longfellow says There is no death what seems so is transition and to me this giving taking and returning by Nature is one of the grandest things in the world He who is near to Nature s heart is very near his Creator It is the love of all that is outdoors and Dame Experience s sharp but unforgettable lessons together with the many things we have learned from books and friends that have made it possible for us to write this volume May it make warm friends and help others to enjoy their garden more than ever before It has been our earnest effort to tell the simple necessary things leaving the deep and scientific parts to those who make such things their life study I trust however that we have left out no links in the chain of the plants
