Oriental Studies Rifaat Y. Ebied, M. J. L. Young, 1980 **The Oxford Handbook of Maritime Archaeology** Alexis Catsambis, Ben Ford, Donny L. Hamilton, 2014-02 This title is a comprehensive survey of maritime archaeology as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has established itself as a mature branch of archaeology *The Etruscan World* Jean MacIntosh Turfa, 2014-11-13 The Etruscans can be shown to have made significant and in some cases perhaps the first technical advances in the central and northern Mediterranean To the Etruscan people we can attribute such developments as the tie beam truss in large wooden structures surveying and engineering drainage and water tunnels the development of the foresail for fast long distance sailing vessels fine techniques of metal production and other pyrotechnology post mortem C sections in medicine and more In art many technical and iconographic developments although they certainly happened first in Greece or the Near East are first seen in extant Etruscan works preserved in the lavish tombs and goods of Etruscan aristocrats These include early portraiture the first full length painted portrait the first perspective view of a human figure in monumental art specialized techniques of bronze casting and reduction fired pottery the bucchero phenomenon Etruscan contacts through trade treaty and intermarriage linked their culture with Sardinia Corsica and Sicily with the Italic tribes of the peninsula and with the Near Eastern kingdoms Greece and the Greek colonial world Iberia Gaul and the Punic network of North Africa and influenced the cultures of northern Europe In the past fifteen years striking advances have been made in scholarship and research techniques for Etruscan Studies Archaeological and scientific discoveries have changed our picture of the Etruscans and furnished us with new specialized information Thanks to the work of dozens of international scholars it is now possible to discuss topics of interest that could never before be researched such as Etruscan mining and metallurgy textile production foods and agriculture In this volume over 60 experts provide insights into all these aspects of Etruscan culture and more with many contributions available in English for the first time to allow the reader access to research that may not otherwise be available to them Lavishly illustrated *The Etruscan World* brings to life the culture and material past of the Etruscans and highlights key points of development in research making it essential reading for researchers academics and students of this fascinating civilization **The Historians' History of the World Vol.2 (of 25) (Illustrations)** Henry Smith Williams, Many a nation has walked God's earth has long enjoyed its good things has come into being and passed away without our knowing anything of its history or even whether it had a history at all For no nation has a history except one that makes history that is to say that influences the course of human development It is with races as with individuals none is kept in mind by posterity save those who have distinguished themselves by ideas that have modified the life of mankind or which comes to the same thing have been pioneers in fresh fields of action The greater the spiritual gain a nation has brought to the rest of the world the longer and more steadily its life has flowed in the channels it was the first to make the longer is its history told among them The nations of history are

those which have put forward in one fashion or another their claim to the dominion of the world Thus we may fitly ask what claim it is that is made upon our interest by the history of the Jewish nation And the answer will be that nothing which excites our attention or stirs us to admiration or imitation in the history of other nations is here present in any large measure Israel was always a small nay a petty nation settled in a narrow space never of any considerable importance in the political history of the East it never brought forth a Ramses II a Sargon an Esarhaddon an Assurbanapal a Nebuchadnezzar or a Cyrus to bear its banner into distant lands Yet for all this the history of Israel has for us an interest quite different from that of those other nations of antiquity And if as we see Israel is far surpassed in martial glory by the peoples of the great empires and by the Romans in their influence on the development of law there are yet other points in which it must yield unquestioned precedence to other nations of antiquity We do not find in Israel the same feeling for beauty as among the Greeks who like no nation before them or after showed forth the laws of beauty in every sphere of intellectual life and to this day in such matters stand forth in a perfection which has never again been attained far less excelled Among the Hebrews there is nothing analogous nothing comparable to what we admire in the Hellenic people It has no epic nothing that can be compared with the Iliad and the Odyssey against which the Germans set the Nibelungen Lied and the Finns the Kalewala it has not the slightest rudiments of a drama the Song of Songs and Job are not dramas There is a school of lyrical poetry unsurpassed for all time and the music that corresponds to it But the bent towards science which actuates the Greeks is wholly lacking wholly lacking the bent towards 2 philosophy Nor was it ever eminent in ancient days in the walks of commerce enterprise and invention by which also a nation may conquer the world its intellectual life is absolutely one sided a one sidedness that produces on us the effect of extreme singularity But the attraction it has for us does not lie in this singularity It is due rather to the circumstance that this small nation has exerted a far greater influence over the course of the history of the whole human race than the Greeks or Romans that to us it has become typical in many more respects than they Our present modes of thought and feeling our lives and actions are far more profoundly influenced by the world of thought and feeling which Israel brought to the birth than by that of Greece or Rome Our whole civilisation to day is saturated with tendencies and impulses which have their origin in Israel To be continue in this ebook *"Each Man Cried Out to His God"* Aaron J. Mertens,Marice E. Rose,2000 The Cesnola Collection in The Metropolitan Museum of Art is the richest and most varied representation outside Cyprus of Cypriot antiquities These works were purchased by the

newly established Museum in the mid 1870s from General Luigi Palma di Cesnola a Civil War cavalry officer who had amassed the objects while serving as the American consul on Cyprus This catalogue is published on the occasion of the opening of the Museum s four permanent galleries for ancient art from Cyprus It is also the first scholarly publication since 1914 devoted to the Cesnola Collection which totals approximately six thousand objects The volume features some five hundred pieces from the collection illustrated in new color photography Dating from about 2500 B C to about A D 300 these works rank among the finest examples of Cypriot art from the prehistoric Geometric Archaic Classical Hellenistic and Roman periods Among the objects are monumental sculpture weapons tools and domestic utensils vases lamps and ritual paraphernalia dedicatory figurines engraved sealstones and jewelry and luxury objects

The Porta Stabia Neighborhood at Pompeii Volume I Steven J. R. Ellis, Allison L. C. Emmerson, Kevin D. Dicus, 2023-07-04 This is the first of four volumes that present the results from the University of Cincinnati s archaeological excavations of the Porta Stabia neighborhood at Pompeii These excavations targeted two town blocks on either side of the via Stabiana insulae VIII 7 and I 1 which comprised modest houses shops workshops food and drink outlets and hospitality buildings The present volume describes and documents the phased structural development of this neighborhood over several centuries The earliest discernible activity here dates to the 6th century BCE with the insulae taking their definitive shape only in the 2nd century BCE It is from this time that production activities dominate the neighborhood only to be wholly replaced by retail oriented street fronts from the early 1st century CE Underpinning this narrative of urban development is a focus on the social and structural making of the Porta Stabia neighborhood along with an interest in both the micro urban site formation processes and macro contextualization of the site setting the results within a larger historic and urban framework
