The Manufacture of Madness Thomas Stephen Szasz, 1975

The Manufacture of Madness Thomas Szasz, 1997-04-01 In this seminal work Dr Szasz examines the similarities between the inquisition and institutional psychiatry His purpose is to show that the belief in mental illness and the social actions to which it leads have the same moral implications and political consequences as had the belief in witchcraft and the social actions to which it led *The manufacture of madness: a comparative study of the Inquisition and the Mental Health Movement* Thomas Stephen Szasz,

Healing Spaces, Modern Architecture, and the Body Sarah Schrank, Didem Ekici, 2016-07-15

Healing Spaces Modern Architecture and the Body brings together cutting edge scholarship examining the myriad ways that architects urban planners medical practitioners and everyday people have applied modern ideas about health and the body to the spaces in which they live work and heal The book s contributors explore North American and European understandings of the relationship between physical movement bodily health technological innovation medical concepts natural environments and architectural settings from the nineteenth century through the heyday of modernist architectural experimentation in the 1920s and 1930s and onward into the 1970s Not only does the book focus on how professionals have engaged with the architecture of healing and the body it also explores how urban dwellers have strategized and modified their living environments themselves to create a kind of vernacular modernist architecture of health in their homes gardens and backyards This new work builds upon a growing interdisciplinary field incorporating the urban humanities geography architectural history the history of medicine and critical visual studies that reflects our current preoccupation with the body and its corresponding therapeutic culture

Hungarian Psychiatry, Society and Politics in the Long Nineteenth

Century Emese Lafferton, 2021-11-29 This book provides the first comprehensive study of the history of Hungarian psychiatry between 1850 and 1920 placed in both an Austro Hungarian and wider European comparative framework Taking an interdisciplinary approach the book captures the institutional worlds of the different types of psychiatric institutions intertwined with the intellectual history of mental illness and the micro historical study of everyday institutional practice It uncovers the ways in which psychiatrists gradually organised themselves and their profession defined their field and role claimed expertise within the medical sciences lobbied for legal reform and the establishment of psychiatric institutions fought for university positions the establishment of departments and specialised psychiatric teaching Beyond this story of increasing professionalization this study also explores how psychiatry became invested in social critique It shows how psychiatry gradually moved beyond its closely defined disciplinary borders and became a public arena with psychiatrists broadening their focus from individual patients to society at large whether through mass publications or participation in popular social movements Finally the book examines how psychiatry began to influence the concept of mental health during

the first decades of the twentieth century against the rich social and cultural context of fin de siècle Budapest and the Austro-Hungarian Dual Monarchy

Divine Mania Yulia Ustinova, 2017-10-16 Our greatest blessings come to us by way of mania provided it is given us by divine gift says Socrates in Plato's Phaedrus Certain forms of alteration of consciousness considered to be inspired by supernatural forces were actively sought in ancient Greece Divine mania comprises a fascinating array of diverse experiences numerous initiates underwent some kind of alteration of consciousness during mystery rites sacred officials and inquirers attained revelations in major oracular centres possession states were actively sought finally some thinkers such as Pythagoras and Socrates probably practiced manipulation of consciousness These experiences which could be voluntary or involuntary intense or mild were interpreted as an invasive divine power within one's mind or illumination granted by a super human being Greece was unique in its attitude to alteration of consciousness From the perspective of individual and public freedom the prominent position of the divine mania in Greek society reflects its acceptance of the inborn human proclivity to experience alteration of consciousness interpreted in positive terms as god sent These mental states were treated with cautious respect and in contrast to the majority of complex societies ancient and modern were never suppressed or pushed to the cultural and social periphery

Troubled by Faith Owen

Davies, 2023-08-29 The nineteenth century was a time of extraordinary scientific innovation but with the rise of psychiatry faiths and popular beliefs were often seen as signs of a diseased mind By exploring the beliefs of asylum patients we see the nineteenth century in a new light with science faith and the supernatural deeply entangled in a fast changing world The birth of psychiatry in the early nineteenth century fundamentally changed how madness was categorised and understood A century on their conceptions of mental illness continue to influence our views today Beliefs and behaviour were divided up into the pathological and the healthy The influence of religion and the supernatural became significant measures of insanity in individuals countries and cultures Psychiatrists not only thought they could transform society in the industrial age but also explain the many strange beliefs expressed in the distant past Troubled by Faith explores these ideas about the supernatural across society through the prism of medical history It is a story of how people continued to make sense of the world in supernatural terms and how belief came to be a medical issue This cannot be done without exploring the lives of those who found themselves in asylums because of their belief in ghosts witches angels devils and fairies or because they thought themselves in divine communication or were haunted by modern technology The beliefs expressed by asylum patients were not just an expression of their individual mental health but also provide a unique reflection of society at the time a world still steeped in the ideas and imagery of folklore and faith in a fast changing world
