Manufacturing Overhead Allocation Traditional Versus Activity Based:

Managerial Accounting for Strategic Decision Making, Preliminary Edition Charles E. Davis, Elizabeth B. Davis, 2010-10-18 Business professionals that need to gain a stronger understanding of key accounting concepts will appreciate this book's approach. It focuses on the core concepts framed within the context of one company C C Sports and its supply chain. Through this example they'll learn fundamentals of how a business operates along with the type of decisions that managers must make on a daily basis. Focus On mini chapters incorporate streamlined complete coverage of certain topics. Reinforcing examples and exercises are also included to enable business professionals to assess their level of understanding before progressing to more advanced discussions. **Managerial Accounting** Charles E. Davis, Elizabeth Davis, 2011-08-09 Realizing that most students in an introductory managerial accounting course are not going to major in accounting, this book seeks to position managerial accounting in a broader context of business decision making. Selection and Evaluation of Advanced Manufacturing Technologies Matthew J. Liberatore, 2012-12-06 Matthew J. Liberatore, Department of Management, Villanova University, Villanova, PA 19085-1. BACKGROUND The weakening competitive position of many segments of U.S. manufacturing has been analyzed, debated, and discussed in corporate boardrooms, academic journals, and the popular literature. One result has been a renewed commitment toward improving productivity and quality in the workplace. The drive to reduce manufacturing-related costs while meeting ever-changing customer needs has led many firms to consider more automated and flexible manufacturing systems. The extent to which these new technologies can support business goals in productivity, quality, and flexibility is an especially important issue for manufacturing firms in the U.S. and other Western nations. Problems have arisen in developing performance measures and evaluation criteria which reflect the full range of costs and benefits associated with these technologies. Some would argue that managerial policies and attitudes, and not the shortcomings of the equipment or manufacturing processes, are the major impediments to implementation.
