Ergonomics Guidelines and Problem Solving A. Mital,Å. Kilbom,S. Kumar,2000-01-31 There is an urgent need to
disseminate ergonomics know how to the work place This book meets that need by providing clear guidelines and problem
solving recommendations to assist the practitioner in decisions that directly protect the health safety and well being of the
worker The guidelines have evolved from a series of symposia on Ergonomic Guidelines and Problem Solving Initially experts
in each area selected were asked to write draft guidelines These guidelines were circulated to participants at the symposia
and to other experts for review before being comprehensively revised In some instances these guidelines cannot be
considered complete but it is important now to put some recommendations forward as guidelines It is hoped that as new
research emerges each guideline will be updated Each guideline has been divided into two parts Part I contains the
guidelines for the practitioner and Part II provides the scientific basis or the knowledge for the guide Such separation of the
applied and theoretical content was designed to facilitate rapid incorporation of the guide into practice The target audience
for this book is the practitioner The practitioner may be a manager production system designer shop supervisor occupational

health and safety professional union representative labor inspector or production engineer For each of the guidelines relevant practitioners are described Topics covered include work space design tool design work rest schedules illumination and maintenance
