The V-Spot Joan Lachkar, 2007-12-24 Everyone knows what the G spot is of course It is a woman's most sensitive and vulnerable physical area Although men do not have a G spot per se both men and women have what Joan Lachkar calls a V spot a concentration of highly charged emotional sensitivities emanating from early childhood experiences that remain raw and unhealed These experiences might involve the parent who abandoned the child at an early

age the mother who smothered the child with too much affection or the child who was neglected and never touched or soothed Another source can be a parent or caretaker who drills the message into the child You re not good enough not deserving enough too demanding etc For men it could be an emotionally castrating controlling dominating overbearing mother Many authors have written and talked about emotional abuse but until The V Spot no one has given this area of volcanic emotion a name or has written about it in terms accessible to layman and professional alike Getting in contact with the V spot is the only way to break away from emotional abuse and begin the healing process No other book pinpoints not only what ignites the V spot but also how and why the resulting affect explosion interferes with judgment reality thinking and perception The reader will be astonished to discover how tracing the source of one s V spot strengthens one s capacity to make complex decisions and lessens the repetitive cycle of pain anxiety confusion and turmoil that blindness to one s V spot can produce

Islamic Terror Avner Falk, 2008-07-30 Independent scholar Falk analyzes the genesis of Islamic terror from many standpoints including religious, cultural, historical, political, social, economic, and above all, psychological. Drawing on his training as a clinical psychologist, Falk's writings specialize in psychohistory and political psychology. Here he examines topics including infantile experience and adult terrorism, the meaning of terror, terrorists and their mothers' narcissistic rage, and Islamic terror, and whether terrorists are normal people as some scholars claim. He also describes the infantile development of terrorist pathology, non-psychoanalytic theories of terrorism, globalization's effect on terrorism, and the notion of the clash of civilizations. Other topics addressed in this reader-friendly analysis include history's first Islamic terrorists and three important cases: two recent deadly terrorists and a primary figure in our current war on terror.

Independent scholar Falk analyzes the genesis of Islamic terror from many standpoints including religious, cultural, historical, political, social, economic, and above all, psychological. Drawing on his training as a clinical psychologist, Falk's writings specialize in psychohistory and political psychology. Here he examines topics including infantile experience and adult terrorism, the meaning of terror, terrorists and their mothers' narcissistic rage, and Islamic terror, and whether terrorists are normal people as some scholars claim. He also describes the infantile development of terrorist pathology, non-psychoanalytic theories of terrorism, globalization's effect on terrorism, and the notion of the clash of civilizations. Examining the emotional structure of traditional Muslim families, Falk shows us the Muslim child's ambivalence toward his or her parents, ways in which Muslims abuse women and children, and the roots of Muslim rage and why all of that plays into the development of future terrorism. Other topics addressed in this reader-friendly analysis include history's first Islamic terrorists and three important cases: two recent deadly terrorists and a primary figure in our current war on terror.

The central idea throughout the book is that a person's attitude toward terror and terrorism, as well as whether he or she becomes a murderous terrorist or even who wages a global war on terror, has much to do with that person's own terrifying experiences in infancy and childhood. Such terror usually experienced first in the earliest interactions with the mother is symbolically expressed, as Falk shows, in fairy tales and myths about terrifying witches and female monsters. Further terror may be experienced in the relationship with the father and also in various other traumatic ways. It is these early terrors, when extreme and uncontrollable, that most often produce terrorists and wars on terror. Falk argues. Thus, his book focuses on the conscious but also on the irrational and unconscious causes of terrorism.

Suicide Bombers: The Psychological, Religious and Other Imperatives Mary Sharpe, 2008-07-15 Suicide Bombers: The Psychological, Religious and Other

Imperatives provides wisdom and insight in an inter group situation characterized by huge gulfs and misperceptions The Western media has focused on fundamentalists as the voice of Islam and helped to shape a warped stereotype of the vast majority of Muslims who are actually moderate in attitudes This volume provides a corrective by explaining how de radicalization programs are being spearheaded by Muslims themselves and also by exploring the best strategies for understanding and dealing with Islamic fundamentalism and suicide terrorism The chapters reflect the international interdisciplinary nature of the workshops that served as the launching pad from the project This volume reflects a positive trend it is an indication that researchers can lead societies to accurately pinpoint the nature and role of fundamentalists and that they can differentiate between destructive elements on the one hand and the majority of moderates seeking to achieve constructive peaceful inter group relations on the other hand Although there is considerable diversity among the chapters a shared theme is the contextual approach to understanding extremism and suicide terrorism Rather than become seduced by reductionist explanations to do with assumed intra personal characteristics of suicide terrorists the authors focus on the characteristics of groups and contexts
