Averill, 2006-11-06 This extensively researched and elegantly written study offers a fine grained analysis of the origins of the Chinese Communist Revolution in the countryside Building on decades of research in newly available sources and multiple trips to Jiangxi Stephen Averill provides a definitive local perspective on the rise of a revolution that reshaped China and the world A rich work of social history it goes beyond recently popular organizational approaches to explore the ways in which the party and social networks interpenetrated and interacted in the early stages of revolutionary base building The Jinggangshan highlands provided the base for Mao Zedong s first efforts at rural revolution Chinese histories and most Western accounts have focused on the heroic exploits of Mao and his Communist Party comrades battling the natural elements hostile military forces and skeptical authorities in the urban based Communist Central Committee This long awaited work penetrates the hagiographic haze of Mao centered analysis to provide a close narrative and rich social history of the Jinggangshan base The author explores the historical patterns of local strongman rule clientelist politics lineage conflict and ethnic struggle within which the party competed for power Through this multifaceted lens the revolutionary experience in Jinggangshan is equally dramatic but considerably more sobering than the conventional story Among Western studies of the Chinese revolution this work stands out as the definitive account of the critical moment in the 1920s when the physical and ideological center of the Communist movement shifted from the cities to the countryside This was a process of elite mediated political osmosis and adaptive compromises with local traditions The party was not simply an outside force manipulating social tensions for its own political ends There was instead an intricate interweaving of local networks and social cleavages in the highlands with the political structures and policy divisions of t

**China's Selective Identities** Dominik Mierzejewski,Bartosz Kowalski,2018-09-05 This book discusses the role of selective identities in shaping China's position in regional and global affairs It does so by using the concept of the political transition of power and argues that by taking on different types of identities of state ideology and culture the Chinese government has adjusted China's identity to different kinds of audiences By adopting different kinds of self China has secured its relatively peaceful transition within the existing system and in the meantime strengthened its capacity to place its principles within that system To its immediate neighbors China presents itself as a state that needs clearcut borders In relation to the developing world Global South the PRC narrates self as an ideology with the banner of materialism equality and justice To its third audience the developed world mainly Europe China presents itself as a peaceful innocent cultural construct based primarily on Confucius passive approach By bringing these three identities into one Chinese body *sanwei yiti* China's policymakers skillfully maneuver and build the country's position in the arena of global affairs

*China Since 1919* Alan Lawrance,2004 A sourcebook that tells the momentous history of China since 1919 mainly from the viewpoints of

participants including extracts from telegrams speeches memoirs political statements and letters and poems *Language, Corpora, and Technology in Applied Linguistics* Muhammad Afzaal, Swaleha Bano Naqvi, Geng Qiang, 2023-11-27 As culture and society has become more digitalized especially when computer science and digital technologies have entered a new era in the twenty first century translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies On the one hand technologies like NLP topic modeling network analysis and data visualization make distant reading become possible thus allowing us to have a paradigmatic view of how human s ideas beliefs values knowledge and even emotions have spread in some patterns across cultural geographical and language divides in world history On the other hand corpus methods such as the use of keywords collocates and concordance lines changed the way by which texts were closely read from linear to vertical With microscope like corpus tools we could go deeper into the texture for perception of nuanced meaning While considering a fact that translation is seldom mono modal in conveying meaning we have to reconceptualize context as a multimodal environment where audio visual and other resources interact to convey and make meaning With regard to the fast development of digital technology translation studies take an active role in gaining an enhanced capability in promoting transformation Complexity has been favored in terms of theoretical framework and methodology New questions are asked old ones revisited with novel tools but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods We could ask if digital technologies would bring new innovation to study of translation history a heavily walled land for traditional humanists who tend to repeat so what to question the less significance of data driven studies The idea of high quality machine translation has become so realistic in today s market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms Machine translation assisted communication could help remove boundaries for better communication but at the same time it also creates conflicts and leads to confrontation Thus understood it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies This Research Topic is intended to promote current directions and new developments in cross disciplinary critical discourse research We welcome papers which from a critical analytical perspective deal with contemporary social scientific political economic or professional discourses and genres Papers addressing the highlighted topics are especially welcome In giving weight to these topics we wish to call to attention some of the most pressing problems currently facing the world *Transforming Author Museums* Ulrike Spring, Johan Schimanski, Thea Aarbakke, 2021-10-15 Literary museums today must respond to new challenges the traditional image of the author s home museum as a sacred place of literary pilgrimage centered around a national hero has been questioned and literary museums have begun to develop new strategies

centered not only on biography but also literary texts imagined spaces different readers historical contexts architectural concepts and artistic interventions As this volume shows the changing of spaces asks how literary museums create new ways of interlinking real and literary spaces texts objects readers and tourists

**The Oxford Handbook of the History of Communism** S. A. Smith, 2014-01-09 The impact of Communism on the twentieth century was massive equal to that of the two world wars Until the fall of the Soviet Union in 1991 historians knew relatively little about the secretive world of communist states and parties Since then the opening of state party and diplomatic archives of the former Eastern Bloc has released a flood of new documentation The thirty five essays in this Handbook written by an international team of scholars draw on this new material to offer a global history of communism in the twentieth century In contrast to many histories that concentrate on the Soviet Union The Oxford Handbook of the History of Communism is genuinely global in its coverage paying particular attention to the Chinese Revolution It is global too in the sense that the essays seek to integrate history from above and from below to trace the complex mediations between state and society and to explore the social and cultural as well as the political and economic realities that shaped the lives of citizens fated to live under communist rule The essays reflect on the similarities and differences between communist states in order to situate them in their socio political and cultural contexts and to capture their changing nature over time Where appropriate they also reflect on how the fortunes of international communism were shaped by the wider economic political and cultural forces of the capitalist world The Handbook provides an informative introduction for those new to the field and a comprehensive overview of the current state of scholarship for those seeking to deepen their understanding

**Mao** Lee Feigon, 2003-07-24 Mr Feigon argues that the movements for which Mao is almost universally condemned today the Great Leap Forward and especially the Cultural Revolution were in many ways beneficial for the Chinese people While not glossing over Mao's mistakes he contends that the Chinese leader should be largely praised for many of his later efforts In reevaluating Mao's contributions this interpretive study reverses the curve of criticism Feigon performs a service by reclaiming the historical context of Mao's crazed era He has written a concise work that forces the reader to recall the circumstances that abetted Mao's reign Far Eastern Economic
