Advances in Modeling and Management of Urban Water Networks Alberto Campisano,Enrico Creaco,2021-01-06 The Special Issue on Advances in Modeling and Management of Urban Water Networks UWNs explores four important topics of research in the context of UWNs asset management modeling of demand and hydraulics energy recovery and pipe burst identification and leakage reduction In the first topic the multi objective optimization of interventions on the network is presented to find trade off solutions between costs and efficiency In the second topic methodologies are presented to simulate and predict demand and to simulate network behavior in emergency scenarios In the third topic a methodology is presented for the multi objective optimization of pump as turbine PAT installation sites in transmission mains In the fourth topic methodologies for pipe burst identification and leakage reduction are presented As for

the urban drainage systems UDSs the two explored topics are asset management with a system upgrade to reduce flooding and modeling of flow and water quality with analyses on the transition from surface to pressurized flow impact of water use reduction on the operation of UDSs and sediment transport in pressurized pipes The Special Issue also includes one paper dealing with the hydraulic modeling of an urban river with a complex cross section

Reading Westworld Alex Goody, Antonia Mackay, 2019-05-09 Reading Westworld is the first volume to explore the cultural textual and theoretical significance of the hugely successful HBO TV series Westworld The essays engage in a series of original enquiries into the central themes of the series including conceptions of the human and posthuman American history gaming memory surveillance AI feminism imperialism free will and contemporary capitalism In its varied critical engagements with the genre narratives and contexts of Westworld this volume explores the show s wider and deeper meanings and the questions it poses as well considering how Westworld reflects on the ethical implications of artificial life and technological innovation for our own futurity With critical essays that draw on the interdisciplinary strengths and productive intersections of media cultural and literary studies Reading Westworld seeks to respond to the show s fundamental question Have you ever questioned the nature of your reality It will be of interest to students academics and general readers seeking to engage with Westworld and the far reaching questions it poses about our current engagements with technology

The Geospatial Web Arno Scharl, Klaus Tochtermann, 2009-02-28 The most important attribute of geospatial platforms is their unique potential to aggregate a multitude of public and private geographic data sets providing access to data from government agencies industry and the general public NASA and other organizations have a wealth of planetary science data representing the output from thousands of satellites in earth orbit and from dozens of costly missions to other planets Benefits derived from both the data and visual interfaces to access the data represent a significant return on investment for the public Integrating geospatial data with semantic and collaborative Web technology multiplies the public benefits and represents the main focus of this book The user interfaces of geobrowsers are designed for the layperson giving convenient access to all kinds of geographically referenced information Geobrowsers hide the technical details related to finding accessing and retrieving such information The daunting challenge of the Geospatial Web is to seamlessly integrate and display vastly different information modes Nowadays it is not enough to simply display a map of some region additional dynamic information modes need to be displayed and put into context from weather sensor readings and live aerial video feeds to daily news updates photo collections and video archives

The SAGE Handbook of Spatial Analysis A Stewart Fotheringham, Peter A Rogerson, 2008-12-22 The widespread use of Geographical Information Systems GIS has significantly increased the demand for knowledge about spatial analytical techniques across a range of disciplines As growing numbers of researchers realise they are dealing with spatial data the demand for specialised statistical and mathematical methods designed to deal with spatial data is undergoing a rapid increase Responding to this demand The Handbook of Spatial Analysis is a comprehensive

and authoritative discussion of issues and techniques in the field of Spatial Data Analysis Its principal focus is on why the analysis of spatial data needs separate treatment the main areas of spatial analysis the key debates within spatial analysis examples of the application of various spatial analytical techniques problems in spatial analysis areas for future research Aimed at an international audience of academics The Handbook of Spatial Analysis will also prove essential to graduate level students and researchers in government agencies and the private sector *Toponym Resolution in Text* Jochen L. Leidner,2008 Originally presented as author s thesis Doctor of Philosophy University of Edinburgh 2007 [Online Collective Action](#) Nitin Agarwal,Merlyna Lim,Rolf T. Wigand,2014-08-01 This work addresses the gap in the current collective action literature exposed by the new Information and Communication Technologies ICTs landscape by bringing together qualitative and quantitative studies from computational and social sciences The book offers a rigorous and systematic investigation of both methodological and theoretical underpinnings and thus collectively promotes a symbiotic and synergistic advancement of the multiple interconnected disciplines in studying online collective actions More specifically the book is intended to illuminate several fundamental and powerful yet theoretically undeveloped and largely unexplored aspects of collective action in the participatory media e g social media Through in depth exploration of relevant concepts theories methodologies applications and case studies the reader will gain an advanced understanding of collective action with the advent of the new generation of ICTs enabled by social media and the Internet The developed theories will be valuable and comprehensive references for those interested in examining the role of ICTs not only in collective action but also in decision and policy making understanding the dynamics of interaction collaboration cooperation communication as well as information flow and propagation and social network research for years to come Further the book also serves as an extensive repository of data sets and tools that can be used by researchers leading to a deeper and more fundamental understanding of the dynamics of the crowd in online collective actions
