Conversations on Science, Culture, and Time Michel Serres, Bruno Latour, 1995 Although elected to the prestigious French Academy in 1990 Michel Serres has long been considered a maverick a provocative thinker whose prolific writings on culture science and philosophy have often baffled more than they have enlightened In these live lively interviews with sociologist Bruno Latour this increasingly important cultural figure sheds light on the ideas that inspire his highly original challenging and trans disciplinary essays **Performing Economic Thought** Bradley Ryner, 2013-12-17 This study examines the structural similarities between English mercantile treatises and drama c1600 1642 Bradley D Ryner analyses the representational conventions of plays and mercantile treatises written between the chartering of the English East India Company in 1600 and the closing of the public playhouses at the outset of the English Civil War in 1642 He shows that playwrights manipulation of specific elements of theatrical representation such as metaphor props dramatic character stage space audience interaction and genre exacerbated the tension between the aspects of the world taken into account by a particular representation and those aspects that it neglects Science-fiction Studies, 2006 The Routledge Companion to Reinventing Management Education Chris Steyaert, Timon Beyes, Martin Parker, 2016-06-17 The position and role of the business school and its educational programmes have become increasingly prominent yet also questioned and contested What management education entails and how it is enacted has become a matter of profound concern in the field of higher education and more generally for the development of the organized world Drawing upon the humanities and social sciences

The Routledge Companion to Reinventing Management Education imagines a different and better education offered to students of management entrepreneurship and organization studies It is an intervention into the debates on what is taught and how learning takes place demonstrating both the potential and the limits of what the humanities and social sciences can do for management education Divided into six sections the book traces the history and theory of management education reimagining central educational principles and outlining an emerging practice based approach With an international cast of authors The Routledge Companion to Reinventing Management Education has been written for contemporary and future educators and for students and scholars who seek to make a difference through their practice Schildberger, 2023-06-19 Free thinking unconstrained by facts The book is based on the thesis that we live in a world of abundance full of natural riches and cultural artifacts full of human intellect and powerful technologies Our thinking however is dominated by the opposite the notion of scarcity The limits of nature act as an inevitable necessity In his book David Schildberger adopts a novel approach to the subject of resources with the help of intelligent instruments that introduce new foods such as chocolate made from cocoa cell cultures and even a fruit bearing vine raised far from a vineyard With his imagined scenarios the author invites the reader to dare stretch their intellectual imaginations and ultimately presents nature as a contingent Conceptual models on the subject of nature and alternative ways of producing food Recommended reading for architectural IT specialists New volume in the Applied Virtuality Book Series Mobility, Space, and Culture Peter Merriman, 2012 Over the past ten to fifteen years there has emerged an increasing concern with mobility in the social sciences and humanities In Mobility Space and Culture Peter Merriman provides an important and timely contribution to the mobilities turn in the social sciences encouraging academics to rethink the relationship between movement embodied practices space and place The book takes an interdisciplinary approach drawing upon theoretical and empirical work from across the social sciences and humanities to provide a critical evaluation of the relationship between mobility and place site reformulating places as in process open and dynamic spatial formations Merriman draws upon post structuralist writings on space practice and society to demonstrate how movement is not simply practised or experienced in relation to space and time but gives rise to rhythms forces atmospheres affects and materialities which are often more crucial to embodied apprehensions of events than sensibilities of spatiality and temporality He draws upon detailed empirical research on experiences of and social reactions to driving in late Victorian and Edwardian Britain to trace how the motor car became associated with sensations of movement space and enmeshed with debates about embodiment health visuality gender and politics The book will be essential reading for undergraduates and postgraduates studying mobility in sociology geography cultural studies politics transport studies and history Contemporary French Environmental Thought in the Post-COVID-19 Era Keith Moser, 2022-04-07 Contemporary French Environmental Thought in the Post COVID 19 Era is focused on the fields of biosemiotics linguistics ecocriticism and environmental ethics Closely aligning with Sustainable Development Goal 13 1

Keith Moser's study aims to strengthen resilience to climate related hazards by drawing on ecological theories developed by French philosophers in conversation with biosemiotic principles Not only does the novel theoretical framework offered by biosemiotic interpretations of the universe and our place in it represent an indispensable conceptual tool for understanding the unprecedented medical challenges at the dawn of a new millennium but it also beckons us to think harder about the environmental crisis that threatens the continued existence of all sentient beings who call the biosphere home This book also highlights the richness diversity and utility of the ecological theories developed by the French philosophers Michel Serres Edgar Morin Jacques Derrida Dominique Lestel and Michel Onfray in addition to how they engage with biosemiotic principles Taken together the book probes the scientific linguistic philosophical and ethical implications of biosemiotic theories in a post pandemic world from an environmental and medical perspective Journal of the History of Ideas, 2006 An international quarterly devoted to intellectual history **Shakespeare and Complexity Theory** Claire Hansen, 2017-06-27 In this new monograph Claire Hansen demonstrates how Shakespeare can be understood as a complex system and how complexity theory can provide compelling and original readings of Shakespeare's plays The book utilises complexity theory to illuminate early modern theatrical practice Shakespeare pedagogy and the phenomenon of the Shakespeare myth The monograph re evaluates Shakespeare his plays early modern theatre and modern classrooms as complex systems illustrating how the lens of complexity offers an enlightening new perspective on diverse areas of Shakespeare scholarship The book s interdisciplinary approach enriches our understanding of Shakespeare and lays the foundation for complexity theory in Shakespeare studies and the humanities more broadly **Shakespeare Studies** Susan Zimmerman, 2006-10 Shakespeare Studies is an international volume published every year in hard cover that contains essays and studies by critics and cultural historians from both hemispheres Although the journal maintains a focus on the theatrical milieu of Shakespeare and his contemporaries it is also concerned with Britain's intellectual and cultural connections to the continent its sociopolitical history and its place in the emerging globalism of the period In addition to articles the journal includes substantial reviews of significant publications dealing with these issues as well as theoretical studies relevant to scholars of early modern culture Volume XXXIV continues the journal s series of Forums in which a group of scholars address an issue of importance to early modern studies The Forum in this issue is entitled Is There Character After Theory Organized and introduced by Raphael Falco it features Tom Bishop Dympna Callaghan Jonathan Crewe Christy Desmet Elizabeth Fowler and Alan Sinfield Volume XXXIV also includes three essays Roger Chartier on Jack Cade the Skin of a Dead Lamb and the Hatred for Writing Julian Yates on Stealing Shakespeare's Oranges and Anston Bosman on Best Play with Mardian Eunuch and Blackamoor and Imperial Culturegram Susan Zimmerman is Professor of English at Queens College City University of New York Garrett Sullivan is Associate Professor of English at Pennsylvania State University White before whiteness in the late Middle **Ages** Wan-Chuan Kao, 2024-01-09 This groundbreaking book analyses premodern whiteness as operations of fragility
