**Social Research Methodology** Pengfei Zhao,Karen Ross,Peiwei Li,Barbara Dennis,2021-01-11 Making Sense of Social Research Methodology A Student and Practitioner Centered Approach introduces students to research methods by illuminating the underlying assumptions of social science inquiry Authors Pengfei Zhao Karen Ross Peiwei Li and Barbara Dennis show how research concepts are often an integral part of everyday life through illustrative common scenarios like looking for a recipe or going on a job interview The authors extrapolate from these personal but ubiquitous experiences to

further explain concepts like gathering data or social context so students develop a deeper understanding of research and its applications outside of the classroom. Students from across the social sciences can take this new understanding into their own research, their professional lives and their personal lives with a new sense of relevancy and urgency. This text is organized into clusters that center on major topics in social science research. The first cluster introduces concepts that are fundamental to all aspects and steps of the research process. These concepts include relationality, identity, ethics, epistemology, validity, and the sociopolitical context within which research occurs. The second and third clusters focus on data and inference. These clusters engage concretely with steps of the research process, including decisions about designing research, generating data, making inferences. Throughout the chapters, Pause and Reflect open-ended questions provide readers with the space for further inquiry into research concepts and how they apply to life. Research Scenario features in each chapter offer new perspectives on major research topics from leading and emerging voices in the field. Moving from this dialogic perspective to more actionable advice, You and Research features offer students concrete steps for engaging with research. Take your research into the world with Making Sense of Social Research Methodology: A Student and Practitioner Centered Approach.
