**Coastal Wetlands: Alteration and Remediation** Charles W. Finkl, Christopher Makowski, 2017-07-18 This book delves into human induced and natural impacts on coastal wetlands intended or otherwise through a series of vignettes that elucidate the environmental insults and efforts at amelioration and remediation The alteration and subsequent restoration of wetland habitats remain key issues among coastal scientists These topics are introduced through case studies and pilot programs that are designed to better understand the best practices of trying to save what is left of these fragile ecosystems Local approaches as well as national and international efforts to restore the functionality of marsh systems are summarily approached and evaluated by their efficacy in producing resilient reclamations in terms of climate smart habitat conservation The outlook of this work is global in extent and local by intent Included here in summarized form are professional opinions of experts in the field that investigate the crux of the matter which proves to be human pressure on coastal wetland environments Even though conservation and preservation of these delicate environmental systems may be coming at a later date many multi pronged approaches show promise through advances in education litigation and engineering to achieve sustainable coastal systems The examples in this book are not only of interest to those working exclusively with coastal wetlands but also to those working to protect the surrounding coastal areas of all types **Beyond the Line** Georg Berkemer, Derek L. Elliot, Ute Fendler, Margret Frenz, Michael Mann, Ineke Phaf-Rheinberger, Sebastian R. Prange, Ana Sobral, Frank Schulze-Engler, 2014-04-23 The title of Beyond the Line refers to the imaginary Line drawn between North and South a division established by the Peace Treaty of Cateau Cambr sis in 1559 This is an early modern time and Eurocentric construction according to which the southern oceanic world has long been taken as symbol of expansionist philosophies and practices An obvious motivation for changing this Line division is the growing influence of the Global South in the contemporary economic and political setting However another motivation for changing opinions in regard to the Line is equally important We observe an emergent consciousness of the pivotal role of the oceanic world for human life This requires the reformulation of former views and raises numerous questions A diversity of connections comes to the mind which demands the composition of a catalogue of case studies with an oceanic horizon Through this operation different problems are being linked together Which problems encounter historians with their research on fishes in the archives How to trace

records about pirates of non European descent in the Indian Ocean Which role play the Oceans as mediators for labor migrations not only of the Black Atlantic but also of people moving from Asia to Africa and vice versa What do we know about workers on the oceans and their routes When considering oceans as contact zones with which criteria can their influence in different literary texts be analyzed Is it possible to study nationalisms taking into account these transoceanic relationships And how do artists address these questions in their use of the media Against the background of this catalogue of oceanic questions old stories are told anew Sometimes their cultural stereotypes are recycled to criticize political and social situations Or in other cases they are adopted for elaborating alternative options In this sense the contributions concentrate on countries like India Kenya Angola or Brazil and cover different academic fields A variety of objects and situations are explored which have been and still are determinant for the construction of cultural narratives in view of the modified relationship with the geographically southern oceanic regions

**Multi-scale Structure Formation and Dynamics in Cosmic Plasmas** Andre Balogh, Andrei Bykov, Jonathan Eastwood, Jelle Kaastra, 2016-02-02. This book offers eleven coordinated reviews on multi-scale structure formation in cosmic plasmas in the Universe. Observations and theories of plasma structures are presented in all relevant astrophysical contexts from the Earth's magnetosphere through heliospheric and galactic scales to clusters of galaxies and the large-scale structure of the Universe. Basic processes in cosmic plasmas starting from electric currents and the helicity concept governing the dynamics of magnetic structures in planet magnetospheres, stellar winds and relativistic plasma outflows like pulsar wind nebulae and Active Galactic Nuclei jets are covered. The multi-wavelength view from the radio to gamma rays with modern high-resolution telescopes discussed in the book reveals a beautiful and highly informative picture of both coherent and chaotic plasma structures tightly connected by strong mutual influence. The authors are all leading scientists in their fields making this book an authoritative up-to-date and enduring contribution to astrophysics.
