The Birds World Nicolae Sfetcu, 2014-11-27 Birds are among the most extensively studied of all animal groups Hundreds of academic journals and thousands of scientists are devoted to bird research while amateur enthusiasts called birdwatchers or more commonly birders probably number in the millions Birds are categorised as a biological class Aves The earliest known species of this class is Archaeopteryx lithographica from the Late Jurassic period According to the most recent consensus Aves and a sister group the order Crocodilia together form a group of unnamed rank the Archosauria Phylogenetically Aves is usually defined as all descendants of the most recent common ancestor of modern birds or of a specific modern bird species like Passer domesticus and Archaeopteryx Modern phylogenies place birds in the dinosaur clade Theropoda Modern birds are divided

into two superorders the Paleognathae mostly flightless birds like ostriches and the wildly diverse Neognathae containing all other birds *School Library Journal* ,2005 **Considering Animals** Dr Carol Freeman, Dr Elizabeth Leane, Ms Yvette Watt, 2013-07-28 *Considering Animals* draws on the expertise of scholars trained in the biological sciences humanities and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals Taking their cue from the specific animal moments that punctuate these interactions the essays engage with contemporary issues and debates central to human animal studies the representation of animals the practical and ethical issues inseparable from human interactions with other species and perhaps most challengingly the compelling evidence that animals are themselves considering beings Case studies focus on issues such as animal emotion and human sentimentality the representation of animals in contemporary art and in recent films such as *March of the Penguins* *Happy Feet* and *Grizzly Man* animals experiences in catastrophic events such as Hurricane Katrina and the SARS outbreak and the danger of overvaluing the role humans play in the earth's ecosystems From Marc Bekoff's moving preface through to the last essay *Considering Animals* foregrounds the frequent sometimes uncanny exchanges with other species that disturb our self-contained existences and bring into focus our troubled relationships with them Written in an accessible and jargon-free style this collection demonstrates that in the face of species extinction and environmental destruction the roles and fates of animals are too important to be left to any one academic discipline **Much More Social Studies Through Children's Literature**
