**Marching Under Darkening Skies** Russell W. Glenn,1998 Draws on a review of relevant literature service doctrine training and emerging technologies to assess U S military preparedness to undertake military operations on urbanized terrain *Marching Under Darkening Skies The American Military and the Impending Urban Operations Threat* ,1998 Contemporary international and domestic security environments increasingly demand United States armed services and unified commands commitment to military operations on urbanized terrain MOUT The nation s soldiers and marines have been fighting in cities for much of the nation s history but there is evidence that traditional definitions of success under such conditions may no longer apply Success in accomplishing the assigned military mission can fall short of national political objectives if the cost of that accomplishment includes too great a loss of American or noncombatant life This report provides an analysis of the U S Army s readiness to undertake modern MOUT missions it also notes shortfalls in the nation s other armed services urban operations readiness as appropriate This research was sponsored by the Office of the Assistant Secretary of the Army for Research Development and Acquisition and by the Deputy Chief of Staff for Operations and Plans and was conducted in the Force Development and Technology Program of the RAND Arroyo Center **Armed Conflict in the 21st Century: The Information Revolution and Post-Modern Warfare** , *In Order To Win, Learn How To Fight: The US Army In Urban Operations* Major Christopher S. Forbes,2015-11-06 The urgent requirement for US Army preparedness in conducting urban operations UO is very real As global urbanization continues to increase the contemporary threat environment makes operations in cities impossible to avoid The past decade has demonstrated through the American experiences in Mogadishu and Russian experiences in Grozny less capable forces will attempt to use urban terrain asymmetrically to even the balance of power against technologically superior military forces While we have always had a serious requirement to conduct urban operations the very nature of the cold war which was successful by its deterrence prevented us from ever having to face the reality of fighting such urban engagements In the post cold war era the U S Army is forced to face the realities of fighting in the urban environment It is not enough to speak of preparing for future urban operations the future is here today and the Army must be prepared to engage in urban operations even as it moves towards the objective force Being prepared means having solid doctrine realistic training programs and facilities and appropriate equipment to ensure success on the urban battlefield when the time comes to fight there **Armed conflict in the 21st century** Steven Metz,2000 **Armed Conflict in the 21st Century** Steven Metz,2000 **American Strategy: Issues and Alternatives For the Quadrennial Defense Review** Steven Metz,2022 **Americans and Asymmetric Conflict** Adam B. Lowther,2007-07-30 As the War in Iraq continues to rage many in the White House State Department Department of Defense and outside government are left to wonder if it was possible to foresee the difficulty the United States is currently having with Sunni nationalists and Islamic extremists Recent American military experience offers significant insight into this

question With the fog of the Cold War finally lifting and clarity returning to the nature of conflict the dominance of asymmetry in the military experience of the United States is all too evident Lebanon 1982 1984 Somalia 1992 1994 and Afghanistan 2001 2004 offer recent and relevant insight into successes and failures of American attempts to fight adversaries utilizing asymmetric conflict to combat the United States when it intervened in these three states The results illustrate the difficulty of engaging adversaries unwilling to wage a conventional war and the need for improved strategic and tactical doctrine It is easy Lowther writes for Americans to forget the lessons of past conflicts as the politics of the present dominate His purpose here is to highlight some of history s recent lessons so that we may move forward with an awareness of what experience offers

**Unweaving the Web** Scott Gerwehr, Russell W. Glenn, 2003-02-10 Deception is a powerful yet understudied instrument of war Using the extensive literature on deception in the animal kingdom where ruses of near infinite variety are applied to offense defense and intelligence gathering the authors delve into the theory of deception to reveal new avenues of experimentation These pathways may lead to new technologies or training techniques and provoke a new look at deception doctrine applicable at every level of war ISBN 0 8330 3159 7 Price 24 00 Page count 98 **Military Doctrine** Bert Chapman, 2009-09-03 This comprehensive volume provides a thorough overview of 20th and 21st century military doctrines worldwide Military Doctrine A Reference Handbook takes a thorough look at 20th and 21st century military doctrines around the world It excerpts relevant English language scholarly and governmental literature to paint a picture of how military doctrine has developed in recent history what military doctrines are currently operating on the world stage and where military doctrine is heading in the near future The book casts a wide net scanning the relevant government documents international agreements monographs journals conference papers and Internet resources to present a thorough overview of the importance of military doctrine in today s highly unstable world Because military institutions are important formulators of national military doctrine and not merely implementers this book examines the roles played by military organizations around the world With the proliferation of independent military scholars and the widespread influence of their work in the Internet age the book also scans the gray literature and describes its effects on military doctrine **Parameters**

, 1999 **The United States Army** George D. Bennett, 2002 United States Army Issues Background Bibliography **Armor**, 2000 The magazine of mobile warfare **The Art of Darkness** Scott Gerwehr, Russell W. Glenn, 2000 This research was undertaken to gain a better understanding of the relationship between deception and the urban environment first to explore the power of deception when employed against U S forces in urban operations and second to evaluate the potential value of deception when used by U S forces in urban operations **American Strategy** Steven Metz, 2000 The combination of a congressionally mandated Quadrennial Defense Review QDR a change of presidents and shifts in the global security environment will force or allow American strategists to rethink some of the basic elements of U S strategy and decide if any changes need to be made It is vital that the defense transformation process be strategy driven rather than dictated by

budgets or technology alone In other words the first step in assessing the status and the future of American strategy is to examine the concepts and broad alternatives on which it is built In this monograph the author begins with a survey of the evolution of American defense strategy since the end of the Cold War He then describes some the key issues which will shape the upcoming QDR and assesses a range of strategic alternatives ranging from the existing strategy to some new and innovative ones For each alternative he describes the key assumptions and the risks involved He ends with a slate of recommendations including a controlled shift away from the focus on large scale regional war with rogue states

**Covertaction Quarterly** ,1999      Preparing Potential Senior Army Leaders for the Future David E. Johnson,2002 How well does the Army prepare its senior leaders for future missions involving joint coalition and full spectrum operations This issue paper examines recent Army operational experiences to identify areas in which leaders were not fully prepared with respect to doctrine training and experience areas that could prove problematic in future missions The paper then describes the current institutional training most relevant to developing competencies for such missions and notes its limited attention to the nondoctrinal other than war missions that have occurred since the end of the Cold War The paper analyzes the operational experience and professional military education of a sample of combat arms officers who will potentially become senior Army leaders officers selected to command tactical brigades for promotion to brigadier general and for promotion to major general Most of those officers assessed have had careers focused mainly on Army assignments and few have had experience in post Cold War operations other than war Relatively small fractions of these officers have held more than one joint assignment have multinational staff experience or have participated in other than war contingencies such as Somalia Haiti Bosnia or Kosovo The paper concludes that the Army should provide greater emphasis to joint operational experience and should modify officer education to enhance joint and full spectrum operational competencies      Rand Review ,1998
