century and well into the 21st America's military policies regarding the use of manpower could best be described as an awkward attempt to balance the requirement to win the nation's wars while supporting a socio-political caste system. President Harry Truman signed Executive Order 9981 on July 26, 1948, in response to police violence perpetrated against black veterans. His actions broke this trend and set the military on the path toward true meritocracy. Today retired General Lloyd Austin is the first black American Secretary of Defense, in part due to the barriers broken down by those who served before him. The armed services fiercely resisted integration, gender equality, and LGBTQ equality but over time have grown to value America's wellspring of diversity as a strategic and operational advantage. Under the Trump administration, many military policies supporting transgender inclusion were reversed. This reversal thrust the U.S. military among other institutions into the ideological tug of war that lies at the heart of present-day polarization in American society. This ideological divide is the crux of the public discourse surrounding Critical Race Theory, America's racist and sexist past, and how we contextualize our history going forward for the betterment of the nation. As far as America has come, we still have work to do for Truman's vision of equality of opportunity to become a reality for all Americans. Join this thought-provoking narrative that celebrates brave American military pioneers and challenges us all to continue pushing for a better expression of America.

The Baptism of Early Virginia Rebecca Anne Goetz, 2016-02-15 In *The Baptism of Early Virginia*, Rebecca Anne Goetz examines the construction of race through the religious beliefs and practices of English Virginians. She finds the seventeenth century a critical time in the development and articulation of racial ideologies, ultimately in the idea of hereditary heathenism—the notion that Africans and Indians were incapable of genuine Christian conversion. In Virginia, in particular, English settlers initially believed that native people would quickly become Christian and would form a vibrant partnership with English people. After vicious Anglo-Indian violence dashed those hopes, English Virginians used Christian rituals like marriage and baptism to exclude first Indians and then Africans from the privileges enjoyed by English Christians, including freedom. Resistance to hereditary heathenism was not uncommon, however. Enslaved people and many Anglican ministers fought against planters' racial ideologies, setting the stage for Christian abolitionism in the late eighteenth and early nineteenth centuries. Using court records, letters, and pamphlets, Goetz suggests new ways of approaching and understanding the deeply entwined relationship between Christianity and race in early America. Goetz has done an impressive job bringing religion to the center of the historiography on race, and her study is a must-read for all scholars interested in the development of race and the role of Protestantism in the Atlantic world.

Register of the Kentucky Historical Society In a compact 173 pages, Goetz links race and religion in colonial Virginia in ways that few other scholars have even attempted. *Journal of American History* This is impressive scholarship grounded in letters, pamphlets, court records, colonial statutes, and a wide array of additional archival and secondary sources.
