[Natures Oracle: The Life and Work of W.D. Hamilton](#) Ullica Segerstrale, 2013-02-28 W D Hamilton 1936 2000 was responsible for a revolution in thinking about evolutionary biology a revolution that changed our understanding of life itself He played a central role in the realization that what matters in evolution is not the survival of the individual but of the survival of its genes This provided the solution to the long standing problem of animal altruism that vexed even Darwin himself and in due course resulted in terms like selfish genes kin selection and sociobiology becoming familiar to a wider public Hamilton went on to solve many more major problems and open up ever new fields he shaped much of our current understanding of central problems including the evolution of sexual reproduction and ageing He became world famous and garnered international prizes But this is all in hindsight In fact Hamilton's recognition came late his career is a classic case of misunderstood genius In this illuminating and moving biography Ullica Segerstrale documents Hamilton's extraordinary life and work revealing a man of immense intellectual curiosity an uncompromising truth seeker a naturalist and jungle explorer a risk taker an unconventional scientist with a poet's soul and a deep concern for life on earth and mankind's future [BBC Wildlife](#) , 1998

Sustainable Hospitality and Tourism as Motors for Development Willy Legrand, Claudia Simons-Kaufmann, Philip Sloan, 2012-09-10 It is now widely agreed that the climate is changing global resources are diminishing and biodiversity is suffering Developing countries many of them considered by the World Tourism Organization to be Top Emerging Tourism Destinations UNWTO 2009 are already suffering the full frontal effect of environmental

degradation The challenge for developing countries is a triple edged sword how can economic prosperity be achieved without the perpetual depletion of nature s reserves the destruction of rural habitat and the dislocation of traditional societies Many emerging nations are looking increasingly to the tourism industry as the motor for economic development with hospitality businesses at the forefront This book uses twenty five case studies to demonstrate how it is possible to create income and stimulate regional socio economic development by using sustainable hospitality and tourism attractions These case studies focus on issues such as the protection of indigenous cultures as a source of touristic curiosity the preservation of the environment and the protection of endangered species such as the plight of turtles in Sri Lanka or butterflies in Costa Rica to encourage tourism Some cases cover government supported projects for example the green parks venture and regional tourism development in the Philippines an archaeological park initiative in Honduras and the diversity of nature tourism in St Vincent Sustainable Hospitality and Tourism as Motors for Development is designed to give students academics and practitioners a guide for best practices of sustainable hospitality operations in developing countries Based on case studies it provides a road map of how to achieve the goals of sustainability giving benchmark examples The book not only taps into a contemporary business subject but aims to provide readers with a better understanding of how sustainable theories can be put into practice in hospitality and tourism industries in developing countries **Food & Beverage Market Place** ,2007
