

SERIOUS INJURY AND FATALITY NUMBERS KEEP CLIMBING

- In 2013, Nevada launched the Zero Fatalities traffic safety goal to reduce the number of fatalities in accidents.
- Though fatality figures initially dipped from the last few years, statistics show that fatal accidents and serious injuries on Nevada roads are continuing to climb.
- In some areas the numbers are increasing, particularly in Las Vegas.

FATALITIES ON THE RISE

As statistics from the Nevada Office of Traffic Safety (NOTS) show:

321 traffic fatalities in 2015 is more than a **10%** increase over the 2014 total.

That is close to **30%** more than last year's figure for the same period.

ROAD USER DEATHS

In almost all categories, road user deaths increased from 2014 to 2015:

Moped fatalities jumped from **6** to **14**.

Cyclist deaths doubled from **4** to **8**.

Pedestrian fatalities climbed from **51** to **60**.

2016 STATS

For 2016, things are looking worse.

- Year-to-date numbers show that **50** people have already died in auto collisions.
- Vehicle occupant deaths are up **33%**.
- Pedestrian deaths are up **15%**.
- Cyclist deaths have skyrocketed from just three to **12**.

COST OF INJURY CONTINUES TO GROW

During 2014, the Centers for Disease Control estimated that for every person killed in a car crash, there were **8** people hospitalized and about **100** people evaluated, treated and released from the hospital.

The true cost of injuries extends far beyond the initial hospital bills.

Additional cost considerations include collision repair, missed time from work and school, therapy and other treatment costs, as well as the cost of damage to public facilities and private property.

MAKING HEADWAY IN SOME AREAS

While the figures for fatalities and serious injuries on the whole is staggering, one should take the time to acknowledge success where safety has been improved.

- Overall, the number of serious injuries and deaths per 100 miles driven has fallen.
- Deaths due to drunk driving have fallen.
- Year-to-date information from NOTS shows a **30%** drop in drunk driving deaths and incidents for Clark county so far in 2016.
- 2016 shows a **75%** improvement in the fatality rate for bikers.

MULTIPLE CONTRIBUTING FACTORS

Where a car accident lawyer is concerned, Las Vegas is peppered with variables that can lead to serious injuries and fatalities in collisions.

- The combination of:
 - High visitor numbers
 - Multiple roadside attractions
 - A population boom
- While intoxication still plays a role in car accident injury and death, the number of intoxication-related accidents has dropped in recent years.
- At the same time, incidents where drivers and/or passengers in car crashes are killed or injured due to improper seatbelt use continue to happen.

WHAT CAN BE DONE

The Zero Fatalities initiative has moved resources for road safety across the board.

By providing awareness campaigns, better education resources and installing road improvements, Nevada's driving culture has an improved focus on safety.

BUT ALL ROAD USERS CAN DO MORE TO BOLSTER SAFETY

BE AWARE

The onus for road safety is on all of those driving, riding and walking the streets. Be visible and be alert to stay safe.

STOP

Whether driving, walking, or cycling if the light is red **stop**.

WEAR SEATBELTS

The most effective means of protection in the event of a collision is using the appropriate safety restraint.

IMPAIRED DRIVING

Do not drive under the influence of drugs or alcohol and refuse to allow others to do so. Some prescription medications can impair driving ability so take care to read the labels.

DISTRACTED DRIVING

Do not eat, drink, text, play, watch movies, play games, send messages or take photos while driving. Multi-tasking while driving may have fatal results.
