**Afterlife Encounters** Dianne Arcangel, 2005-09-02 Never before released research proves the dead communicate with us As a former hospice worker and director of the Elisabeth Kbler Ross Center Dianne Arcangel was certain that visitations from beyond death provided comfort and hope for loved ones still grappling with their loss As a researcher however she was unable to find specific data to measure that comfort and hope To remedy this lack of information she created the Afterlife Encounters Survey a five year international survival study Afterlife Encounters reveals the results of this landmark study and for the first time offers a systematic categorization of such encounters explaining when these encounters are most likely to occur and what type of apparition is likely to appear Afterlife Encounters presents not only the data but also the stories beyond the numbers as friends and family members relate their visitation experiences in their own words Included are amazing stories of the dead returning to tell loved ones that they had been murdered and who it was that killed them apparitions revealing where family treasure was buried even one spirit who provided a remarkable account of the tragedies of 9 11 weeks before those events occurred The stats and stories that

Arcangel shares are certain to stay with you for a long time as will her eye opening conclusion afterlife encounters provide real lasting comfort and hope to an astounding 97 percent of those loved ones who experience them **God and the Evolving Universe** James Redfield, Michael Murphy, Sylvia Timbers, 2003-01-06 In a world racked by violence and conflict James Redfield and Michael Murphy leading cocreators of today's spiritual boom present a message of hope and a vision for the future It is no accident they argue that the twentieth and early twenty first centuries have witnessed a revolution in new human capacities Daily we hear and read about supernormal athletic feats clairvoyant perception lives transformed by meditative practices healing through prayer and we ourselves experience these things The authors contend that thousands of years of human striving have delivered us to this very moment in which each act of self development is creating a new stage in planetary evolution and the emergence of a human species possessed of vastly expanded potential *The Future of the Body* Michael Murphy, 1993-04-21 In the oral and written histories of every culture there are countless records of men and women who have displayed extraordinary physical mental and spiritual capacities In modern times those records have been supplemented by scientific studies of exceptional functioning Are the limits of human growth fixed Are extraordinary abilities latent within everyone Is there evidence that humanity has unrealized capacities for self transcendence Are there specific practices through which ordinary people can develop these abilities Michael Murphy has studied these questions for over thirty years In *The Future of the Body* he presents evidence for metanormal perception cognition movement vitality and spiritual development from more than 3 000 sources Surveying ancient and modern records in medical science sports anthropology the arts psychical research comparative religious studies and dozens of other disciplines Murphy has created an encyclopedia of exceptional functioning of body mind and spirit He paints a broad and convincing picture of the possibilities of further evolutionary development of human attributes By studying metanormal abilities under a wide range of conditions Murphy suggests that we can identify those activities that typically evoke these capacities and assemble them into a coherent program of transformative practice A few of Murphy's central observations and proposals include The observation that cultural conditioning powerfully shapes or extinguishes metanormal capacities The proposition that we cannot comprehend our potentials for extraordinary life without an empirical approach that involves many fields of inquiry and different kinds of knowing The notion that a widespread realization of extraordinary capacities would constitute an evolutionary transcendence analogous to the rise of humankind from its primal ancestry The proposal that all or most instances of significant human development are produced by a limited number of identifiable activities such as disciplined self observation visualization of desired capacities and caring for others The idea that a balanced development of our various capacities is possible through integrated practices In *The Future Of The Body* Murphy states that such practices can carry forward Earth's evolutionary adventure and lead humanity to the next step in its development High Static, Dead Lines Kristen Gallerneaux, 2021-02-24 A literary mix tape that explores the entwined boundaries between sound material culture

landscape and esoteric belief Trees rigged up to the wireless radio heavens A fax machine used to decode the language of hurricanes A broadcast ghost that hijacked a television station to terrorize a city A failed computer factory in the desert with a slap back echo resounding into ruin In *High Static Dead Lines* media historian and artist Kristen Gallerneaux weaves a literary mix tape that explores the entwined boundaries between sound material culture landscape and esoteric belief Essays and fictocritical interludes are arranged to evoke a network of ley lines for the sonic spectre to travel through a hypothetical presence that manifests itself as an invisible layer of noise alongside the conventional histories of technological artifacts The objects and stories within span from the mid nineteenth century to the present day touching upon military communications and cultural history A connective thread is the recurring presence of sound audible self generative and remembered charting the contentious sonic histories of paranormal culture

**The Heartbeat of Intelligence** Elaine Matthews, 2001-07-10 *The Evolving Heart Nature s Astonishing Evolutionary Intention for Humanity* *The Heartbeat of Intelligence* shows why we are not fulfilling our potential as individuals and as a species It shows how and why we stepped off the evolutionary path intended by Nature a path which would have put us several evolutionary steps ahead of where we are now had we not strayed from it The book shows how stepping off the

path has severely jeopardized the mysterious connection between the heart and the brain a connection which is essential for our continued evolution as a species The author believes that we will not continue evolving or even survive as a species without that understanding The book explains The theory of neoteny and why this is the most crucial aspect of human evolution Why synchronicity is the law by which human beings will live in the future How left brain dominance has led to nearly all of the problems we face today Why Nature is far more profound and mysterious than science allows Why seeing the Universe as a hologram answers so many puzzling questions Love and compassion passion and joy goodness and beauty are the birthright of every human being built into our genes and intended by Nature to speak in every beat of our heart The book shows us the delightful steps of joy and lightness which will not only take us several evolutionary steps forward but will help us save our beautiful planet Astonishingly this could all be accomplished in less than a generation

**Encountering Mystery** Dale C. Allison,2022-07-26 Despite widespread skepticism on the matter a significant number of people today have stories of religious experience moments of inexplicable terror or rapturous joy visions near death experiences of the afterlife encounters with angels heavenly voices and premonitions How should rationally minded people respond What would your reaction be if someone told you that one night while sitting alone she saw through the window a brilliant light descend from the sky until it was so large that it filled the room and that it radiated a feeling of pure love And what would you say if a friend confided that one night he woke up and could not move felt he was being suffocated and sensed an evil spirit in the room By default in the secular age we are skeptical about anything mysterious or supernatural More likely than not most people would respond to the stories above with embarrassment and concern about the person s grasp of reality or they would attempt to explain them away through rational or scientific means But the truth is that religious experiences like these are not as uncommon as they seem although talking about such experiences often is This is the case even in a faith tradition such as Christianity despite the Bible s numerous accounts of miraculous and mysterious happenings In Encountering Mystery noted biblical scholar Dale Allison makes the argument that stories of religious experience are meaningful and not to be marginalized and that we have a moral prerogative to lovingly engage with such stories regardless of whether we have had similar experiences Through a close look at phenomena such as moments of

inexplicable terror or rapturous joy visions near death experiences of the afterlife encounters with angels heavenly voices and premonitions Allison shows how ordinary practices of faith need not be at odds with individual religious experiences Above all he enjoins us to be honest about the persistence of religious experience in a secular age and to make space for those who encounter mystery in their lives *PROJECTIOLOGY* Waldo Vieira,2023-09-27 A comprehensive post materialist treatise on the out of body experience and psychic phenomena Projectiology is an authoritative technical and scholarly volume that provides definitive information on the out of body experience OBE and paranormal and psychic phenomena It is a detailed work that orients the reader in their understanding and development of energetic self control and psychic awareness As such it is an invaluable source of information on the interaction between the physical and non physical worlds
