Nagaland's Economy In Transition Since 1964:

Nagaland's Economy in Transition Since 1964 Swabera Islam Saleh, 1989 *Change and Development in Phom Naga Society* A. Rahman, 2015-01-01 *Change and Development in Phom Naga Society* is a comprehensive book which describes the various socio political aspects of the Phom Naga Tribe of Nagaland. The book throws light on the topographical and demographic character of Longleng district, the home of the Phoms, along with their traditional beliefs, customs, and institutions, and also their stages of migration to the present domicile. The study highlights the emergence of the Phom identity and their relations with the neighbours. Elaborate discussions are made especially on the social change, economic transformation from traditional to a modern economy, administrative and political development of the people, with references to their role in the political process of the state since independence. Assessing the pace of development that has been witnessed in the Phom inhabited areas over the bygone decades, the author tries to trace the internal and external challenges which the society has been facing. The book will definitely be useful to researchers, planners, policy makers, and social workers.

Agriculture and a Changing Environment in Northeastern India Sumi Krishna, 2020-11-29 India's northeastern region, forged by a unique geological history and peopled by several waves of migration, is extraordinarily complex. Farming systems in the hills and the riverine plains are embedded in a heterogeneous environment comprising forests, wetlands, and fields shaped over centuries by nature and people. Today, the environment and economy are undergoing rapid transformation, affecting people's lives, livelihoods, and methods of food production. The essays in this volume bring a multi-disciplinary perspective to critical aspects of the process of agricultural change, examine the gender dimensions of agriculture, and explore initiatives for sustainable livelihood and ecological conservation. Part I analyses the impact of policies and people's own aspirations on the closely intertwined ecology and economy of the region. Part II discusses the gender dynamics of farming, forestry, and biodiversity in a socio-cultural context where women are primarily responsible for food production. Part III highlights some alternative farming interventions and community-based efforts for environmental conservation, sustainable resource management, and improved livelihoods. This book will be useful to scholars and students of agriculture, economics, development, environment, and gender studies, and to those involved in policy analysis, natural resource management, and community organisation, as also general readers interested in India's northeastern region. **Rural**
