Violence and Power in Ancient Egypt Laurel Bestock, 2017-10-25 *Violence and Power in Ancient Egypt* examines the use of Egyptian pictures of violence prior to the New Kingdom Starting with the assertion that making and displaying such images served as a tactic of power related to but separate from the actual practice of violence the book explores the development and deployment of this imagery across different contexts By comparatively utilizing violent images from a variety of other times and cultures the book asks that we consider not only how Egyptian imagery was related to Egyptian violence but also why people create pictures of violence and place them where they do and how such images communicate what to whom By cataloging and querying Egyptian imagery of violence from different periods and different contexts royal tombs divine temples the landscape portable objects and private tombs *Violence and Power* highlights the nuances of the relationship between aspects of royal ideology art and its audiences in the first half of pharaonic Egyptian history *The Oxford Handbook of Egyptology* Ian Shaw, Elizabeth Bloxam, 2020 *The Oxford Handbook of Egyptology* offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period Transcending conventional boundaries between archaeological and ancient textual analysis and bringing together 63 chapters that range widely across the various archaeological philological and cultural sub disciplines authored by recognized experts in their respective fields it highlights the extent to which the discipline has diversified and stresses the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant Authoritative yet accessible it is an invaluable resource for scholars students and general readers alike *Egypt at Its Origins* Stan Hendrickx, 2004 This volume published in memory of Barbara Adams presents 57 contributions by authors from 16 different countries and contains the results of the latest research on Predynastic and Early Dynastic Egypt In addition to papers originally presented at the 2002 conference in Krakow there are the invited contributions by the friends and colleagues of Barbara Adams including several on new discoveries from and thoughts about the site of Hierakonpolis *The Cambridge World Prehistory* Colin Renfrew, Paul Bahn, 2014-06-09 *The Cambridge World Prehistory* provides a systematic and authoritative examination of the prehistory of every region around the world from the early days of human origins in Africa two million years ago to the beginnings of written history which in some areas started only two centuries ago Written by a team of leading international scholars the volumes include both traditional topics and cutting edge approaches such as archaeolinguistics and molecular genetics and examine the essential questions of human development around the world The volumes are organised geographically exploring the evolution of hominins and their expansion from Africa as well as the formation of states and development in each region of different technologies such as seafaring metallurgy and food production *The Cambridge World Prehistory* reveals a rich and complex history of the world It will be an invaluable resource for any student or scholar of archaeology and related disciplines looking to research a particular topic tradition region or

period within prehistory **Historical Dictionary of Ancient Egypt** Morris L. Bierbrier, 2008-08-14 The great pyramids of Giza Tutankhamun the Great Sphinx Cleopatra and Ramesses II the names and achievements of Ancient Egypt are legendary Situated along the Nile River the Ancient Egyptian civilization began around 3150 BC and lasted over three millennia until it was conquered by Rome in 31 BC The second edition of the Historical Dictionary of Ancient Egypt expands upon the information presented in the first with a chronology an introductory essay appendixes a bibliography and hundreds of cross referenced dictionary entries on Egyptian rulers bureaucrats and commoners whose records have survived as well as ancient society religion and gods **A Companion to Ancient Egyptian Art** Melinda K. Hartwig, 2014-11-17 A Companion to Ancient Egyptian Art presents a comprehensive collection of original essays exploring key concepts critical discourses and theories that shape the discipline of ancient Egyptian art Winner of the 2016 PROSE Award for Single Volume Reference in the Humanities Social Sciences Features contributions from top scholars in their respective fields of expertise relating to ancient Egyptian art Provides overviews of past and present scholarship and suggests new avenues to stimulate debate and allow for critical readings of individual art works Explores themes and topics such as methodological approaches transmission of Egyptian art and its connections with other cultures ancient reception technology and interpretation Provides a comprehensive synthesis on a discipline that has diversified to the extent that it now incorporates subjects ranging from gender theory to X ray fluorescence and image based interpretations systems *The Egyptian World* Toby Wilkinson, 2007-09-18 The Egyptian World provides an authoritative exploration of Ancient Egyptian civilization The volume covers seven broad themes with each section allowing specialists to focus on a particular topic *Empires to be remembered* Michael Gehler, Robert Rollinger, 2022-03-10 By applying a comparative approach the volume focuses on a select group of empires which are generally not in the focus of empires studies They are studied in detail and analyzed due to a strict concept that takes into account real history and reception history as well Reception history becomes more and more an important element in empire studies although this topic is still often more or less underdeveloped The volume singles out a series of such forgotten empires It aims to provide a methodologically clearly structured as well as a uniform and consistent approach It develops a general set of questions that help to compare and distinguish these entities This way the volume intends to examine and to illuminate empires that are generally ignored by modern scholarship *Balat XII* Clara Jeuthe, 2021-04-01 In the area of Balat on the eastern Dakhla Oasis the archaeological mission of the French Institute for Oriental Archaeology has uncovered a large area consisting of various camps dating from the early 4th Dynasty ca 2600 BC which were briefly but intensively occupied These are understood to have served as residential base camps for some of the indigenous and not yet fully sedentary population of the oasis the so called Late Sheikh Muftah group Little is known about this rather enigmatic group but the excavations at Balat have revealed for the first time a well preserved intra site stratigraphy with hitherto unknown dwelling features for Sheikh Muftah contexts The data gathered here is based on

analysis of the features the material culture and in depth scientific studies The new evidence offers not only hints about local crafts food production and environmental conditions in Balat but also represents a new contribution to ongoing discussions on subsistence and patterns of mobility of non sedentary groups in the Western Desert This has given archaeologists a glimpse of the lifestyle of the Sheikh Muftah group and also for the first time shone a spotlight on daily life in a camp site in the oasis depression The date of this occupation in the Early Old Kingdom falls into a period when Egyptian Pharaonic presence was just beginning to be evident in archaeological data Cross cultural contacts between the Balat Sheikh Muftah community and the Egyptian Pharaonic population both within the oasis and into the Nile Valley are also in evidence and contribute to the discussions on transcultural exchange and assimilation processes in the oasis

Writing as Material Practice Kathryn E. Piquette, Ruth D. Whitehouse, 2013-12-18 Writing as Material Practice grapples with the issue of writing as a form of material culture in its ancient and more recent manifestations and in the contexts of production and consumption Fifteen case studies explore the artefactual nature of writing the ways in which materials techniques colour scale orientation and visibility inform the creation of inscribed objects and spaces as well as structure subsequent engagement perception and meaning making Covering a temporal span of some 5000 years from c 3200 BCE to the present day and ranging in spatial context from the Americas to the Near East the chapters in this volume bring a variety of perspectives which contribute to both specific and broader questions of writing materialities The authors also aim to place past graphical systems in their social contexts so they can be understood in relation to the people who created and attributed meaning to writing and associated symbolic modes through a diverse array of individual and wider social practices
