*Names, words, and graves*, 1979      *Names, Words, and Graves* University of Leeds, 1979      **Early Medieval Settlements** Helena Hamerow, 2004 This is an overview and synthesis of the extensive and rapidly growing body of archaeological evidence for early medieval buildings settlements farming craft production and trade among the rural communities of north west Europe      **Names, Words, and Graves** University of Leeds, 1979      **Local, regional and ethnic identities in early medieval cemeteries in Bavaria (Premio Ottone d'Assia e Riccardo Francovich 2008)** Susanne Hakenbeck, 2011-03-01 Tema conduttore dell'opera lo studio dell'etnicità altomedievale condotto attraverso l'analisi di un gruppo di cimiteri nella pianura alluvionale di Monaco di Baviera e l'esame dello sviluppo della pratica funeraria in un periodo che va dal V al VII secolo d.C. Iniziate come un atto ibrido di pratiche tardo romane e barbariche quando nel secolo successivo le comunità politiche tribali si consolidarono le modalità di sepoltura presero le distanze dalle loro origini romane divenendo apertamente barbare. Lo studio delle sepolture diviene per l'Autore un motivo per una più ampia riflessione sul concetto di identità e sui rapporti fra cultura materiale ed etnia. Contiene il riassunto del volume in italiano      *State and Society in the Early Middle Ages* Matthew Innes, 2000-04-24 This book first published in 2000 is a pioneering study of politics and society in the early Middle Ages. Whereas it is widely believed that the source materials for early medieval Europe are too sparse to allow sustained study of the workings of social and political relationships on the ground this book focuses on a uniquely well documented area to investigate the basis of power. Topics covered include the foundation of monasteries their relationship with the laity and their role as social centres the significance of urbanism the control of land the development of property rights and the organization of states community kinship and lordship justice and dispute settlement the uses of the written word violence and the feud and the development of political structures from the Roman empire to the high Middle Ages

*Social Identity in Early Medieval Britain* William O. Frazer, Andrew Tyrell, 2001-01-01 Social identity is a concept of increasing importance in the social sciences. Here the concept is applied to the often atheoretical realm of medieval studies. Each contributor focuses on a particular topic of early medieval identity: ethnicity national identity social location subjectivity personhood political organization kinship the body gender age proximity regionality memory and ideological systems. The result is a pioneering vision of medieval social identity and a challenge to some of the received general wisdoms about this period      **Settlement and Social Organization** Guy Halsall, 2002-09-05 This book examines one region of north eastern Gaul around Metz in the period between the end of the Roman Empire and the accession of Charlemagne. It adopts a new multi disciplinary approach using all available evidence both documentary and archaeological. It deals with a broad range of historical themes and by looking at the reasons behind the creation of different forms of evidence it examines how the different facets of social organisation ethnicity gender age and social hierarchy were related intimately to each other and to contemporary settlement patterns of the region. As a result it is argued that the Merovingian period was not one of slow

transformation from Roman to medieval but was one of constant dynamic social change and diversity even between the recognised periods of dramatic upheaval Cemeteries and Society in Merovingian Gaul Guy Halsall, 2010 Bundeling van de zeven belangrijkste essays over de sociale interpretatie van de Merovingische begraafplaatsen archeologie **The Barbarian Conversion** Richard A. Fletcher, 1999 An investigation of the process by which large parts of Europe accepted the Christian faith between the fourth and the fourteenth centuries and of some of the cultural consequences that flowed therefrom In a work of splendid scholarship that reflects both a firm mastery of difficult sources and a keen intuition one of Britain's foremost medievalists tells the story of the Christianization of Europe It is a very large story for conversion encompassed much more than religious belief With it came enormous cultural change Latin literacy and books Roman notions of law and property and the concept of town life as well as new tastes in food drink and dress Whether from faith or by force from self interest or by revelation conversion had an immense impact that is with us even today Culture and Religion in Merovingian Gaul, A.D. 481-751 Yitzhak Hen, 2023-09-29 Although often depicted as a barbaric and uncivilised society in the full pejorative meaning of these words Merovingian Gaul was clearly a Christian society and a direct continuation of the Roman civilisation in terms of social standards morals and culture Using insights provided by social history archaeology palaeography and anthropology this book studies the problem of Christianisation in early Medieval Gaul from a cultural point of view While exploiting a huge range of primary and secondary material Dr Hen does not confine himself to a functional analysis of various cultural and religious activities in Merovingian Gaul but goes on to assess the consequences and implications of such activities for the people themselves and for the subsequent developments in the Carolingian period Worcestershire Anglo-Saxon Charter Bounds Della Hooke, 1990 The county of Worcestershire finally formed before the Conquest around the burh of Worcester is exceptionally rich in charter material The charters contain an unusual amount of valuable topographical detail in descriptions of location in comments on the appurtenances of an estate and especially within the boundary clauses which accompany many of the grants or leases From this very full body of texts Dr Hooke has been able to identify features which have enabled her to reconstruct the landscape of Anglo Saxon Worcestershire to a remarkable degree Della Hooke is widely known for her pioneer work on Anglo Saxon charters through which she has been able to reconstruct the Worcestershire landscape as it was almost a thousand years ago The county part of the Anglo Saxon kingdom of the Hwicce responds particularly well to her techniques It is exceptionally rich in Anglo Saxon charters and the physical features of the county which has remained largely agricultural are relatively easy to identify Careful study of the charter evidence throws light on the history of settlement and land use and shows that many features of the medieval county for instance the rich arable lands of the Vale of Evesham and the wooded landscapes of Malvern and Wyre were already present in Anglo Saxon Worcestershire The book presents all the topographical detail in the charters together with all the estate boundaries each charter is individually mapped and the charter's landmarks located The result is the first such

study for any county providing valuable and readily available data for historians and students of land use DELLA HOOKE is Research Fellow in the School of Geography University of Birmingham She is a council member of the Council for Name Studies in Great Britain and Ireland and of the English Place Name Society and editor of Landscape History the journal of the Society for Landscape Studies Her published work relates to her long standing interest in the use of Anglo Saxon charters to trace the evolution of regional landscape RIGHT ALIGN published price 45     The Archaeology of Medieval Germany Günter P. Fehring, 2014-10-24 Medieval archaeology is a relatively young discipline It relies heavily on and contributes to the neighbouring disciplines of history and geography as well as certain of the natural sciences The kinds of sources investigated in the context of medieval archaeology also cast light on many aspects of life in later centuries The main sources used are graveyards churches and churchyards castles and fortifications rural and urban settlements technical production sites and routes of communication Closely allied to these are the numerous finds of small objects of everyday life from cutlery and tools to animal remains and grain This book is a comprehensive discussion of what can be established from the use of such materials about the culture and daily life of medieval Germany Each subject is augmented with the use of many illustrations Besides methodological questions the author considers what can be learnt about the history of settlement and architecture of technology of economic and social matters of churches and missions and of population diet and vegetation     *The Oxford Handbook of the Archaeology of Roman Germany* Simon James, Stefan Krmnicek, 2020 This Handbook makes the work of modern German and overwhelmingly German language scholarship on the archaeology of Roman Germany available in English presenting the latest developments in current research and providing a truly international perspective on the topic

*The End of Roman Britain* Michael E. Jones, 1998 Jones offers a lucid and thorough analysis of the economic social military and environmental problems that contributed to the failure of the Romans drawing on literary sources and on recent archaeological evidence     **Northumbria, 500-1100** David Rollason, 2003-09-25 Publisher Description     Old and Middle English Language Studies

**After Rome's Fall** Walter Goffart, Walter A. Goffart, 1998-01-01 This collection of essays deals with a broad range of issues within the study past and present of the early Middle Ages Subjects include war power ethnicity gender Charlemagne

and Carolingian history The book is largely concerned with reading the sources both medieval and modern and interpreting their narrators

**Money and Power in Anglo-Saxon England** Rory Naismith, 2011-10-06 This groundbreaking study of coinage in early medieval England is the first to take account of the very significant additions to the corpus of southern English coins discovered in recent years and to situate this evidence within the wider historical context of Anglo Saxon England and its continental neighbours Its nine chapters integrate historical and numismatic research to explore who made early medieval coinage who used it and why The currency emerges as a significant resource accessible across society and through analysis of its production circulation and use the author shows that control over coinage could be a major asset This control was guided as much by ideology as by economics and embraced several levels of power from kings down to individual craftsmen Thematic in approach this innovative book offers an engaging wide ranging account of Anglo Saxon coinage as a unique and revealing gauge for the interaction of society economy and government

**The Mediterranean World in Late Antiquity** Averil Cameron, Fellow of the British Academy Warden Keble College Averil Cameron, 2002-09-11 This book provides both a detailed introduction to the vivid and exciting period of late antiquity and a direct challenge to conventional views of the end of the Empire
