Namibias Fisheries Ecological Economic And Social Aspects:

Namibia's Fisheries Ussif Rashid Sumaila,2004 As we search urgently for a strategy of sustainable natural resource management an international debate is brewing over destructive modern fishery methods Namibia s Fisheries is a timely contribution to this discussion as it examines Namibia s Benguela upwelling system an area that supports traditional and modern forms of fishery This volume analyzes the Namibian experience in fishery management featuring essays by researchers Namibian fishery managers and international specialists that cover a range of ecological and social issues Namibia s Fisheries will be a valuable resource for researchers conservationists and students of fishery management *The Economic Impact of Climate Change in Namibia* Hannah Reid,2007 *Climate Change and the Economics of the World's Fisheries* Rögnvaldur Hannesson,Manuel Barange,Samuel F. Herrick,2006-01-01 To date research on the economic implications of climate change on fisheries has been both limited and fragmented The contributors to this volume remedy the lack of attention by investigating the economic consequences of pelagic fish fluctuations in the recent past in order to understand how to adapt and respond to future climate changes Papers Presented at the Norway-FAO Expert Consultation on the Management of Shared Fish Stocks Food and Agriculture Organization of the United Nations,2003-01-01 A critical input into the proceedings of this Expert Consultation were two discussion papers and 12 cases studies contained in this document The first discussion paper addresses the basic requirements and principles for successful management of shared fish stocks derived from game theoretical considerations and practical experiences The second discussion paper presents the legal aspects of the management of shared fish stock **Overcoming Factors of Unsustainability and Overexploitation in Fisheries** Food and Agriculture Organization of the United Nations,2005-01-01 This international workshop was organized in order to identify factors of unsustainability and over exploitation in fisheries and review major issues in the implementation of international fisheries instruments The Workshop was based on a review of discussion papers that took into account the outcomes of the previous workshops on these issues It addressed the following thematic issues governance and fisheries management causes or solutions for unsustainability access and fishing rights fishery management and sustainability dimensions and small scale issues and developing country perspective This document contains the report of the Workshop and eighteen discussion papers submitted by participants *Oceans* Pierre Jacquet, Rajendra K Pachauri, Laurence Tubiana,2011-01-01 *Oceans The New Frontier* explores how human community insistently pushes the oceans limits seeking to exploit all of their varied resources minerals fisheries fuels and genetic material The ocean frontier is constantly being redefined by new discoveries technologies national strategies and ecological imperatives Increasing dependence of humanity on the resources of the oceans has blurred the boundaries between the mainland and oceans As humanity s footprint extends oceans are seeing intense conflicts between actors and issues The book questions the ability of global governance to regulate access to resources and services provided by the oceans so as to protect the ocean ecosystems The

chapters show how the global governance system has not been adequately responsive while in many cases local initiatives have contributed the solutions Special sites like sea ports can provide levers for action Oceans The New Frontier is part of a series of annual publications on sustainable development A Planet for Life prepared under the scientific leadership of leading figures in the field of sustainable development
