Naming and Structuring Guidelines for X.500 Directory Pilots Paul Barker, Steve Kille, Thomas Lenggenhager, 1995-07 Defines a number of naming and structuring guidelines focused on White Pages usage Intended for data managers using X 500 Directory Services Concentrates on DIT structure naming and the usage of attributes for organizations organizational units and personal entries Contains figures *Understanding and Deploying LDAP Directory Services* Tim Howes, Mark Smith, Gordon S. Good, 2003 Lightweight Directory Access Protocol LDAP is the standard for directory information access and is the underlying protocol for a variety of email systems Web systems and enterprise applications LDAP enables central management of users groups devices and other data thereby simplifying directory management and reducing the total cost of ownership Understanding and Deploying LDAP Directory Services written by the creators of the protocol is known as the LDAP bible and is the classic text for learning about LDAP and how to utilize it effectively The Second Edition builds on this success by acting as an exhaustive resource for designing deploying and maintaining LDAP directory services Topics such as implementation pitfalls establishing and maintaining user access to information troubleshooting and real world scenarios will be thoroughly explored Deploying OpenLDAP Tom Jackiewicz, 2007-03-01 Focuses on open standards rather than proprietary systems which are expensive and incompatible with other systems Can be used by someone who already knows advanced programming and implementation but doesn't understand how everything fits together Scripting for network administrators who want to perform tasks but aren't necessarily programmers *The ABCs of LDAP* Reinhard E. Voglmaier, 2003-11-13 This book explores the use of Lightweight Directory Access Protocol LDAP as an efficient protocol It combines all of the relevant information available on the Internet along with a number of arguments treated in the various books that are available and provides many examples of LDAP code **Pro .NET Directory Services Programming** Mikael Freidlitz, Jamie Vachon, Ajit Mungale, Erick Sgarbi, Noel Simpson, 2008-01-01 People who are interested in accessing directory services and particularly Active Directory from .NET code 1 System administrators who need to write code to automate Active Directory and or Exchange related tasks 2 Developers who need to access objects in a directory service programmatically The only book dedicated to Directory Service programming on the .NET platform Goes beyond theory to show real uses of Directory Service programming such as automated administration of users and groups network resources such as computers and printers and Exchange mailboxes Contains many real applications that can be used to perform directory service administration tasks LDAP Metadirectory Provisioning Methodology Marlin Pohlman, 2003 Annotation This work provides system architects a methodology for the implementation of x 500 and LDAP based metadirectory provisioning systems In addition this work assists in the business process analysis that accompanies any deployment DOC Safe Harbor **Handbook on Session Initiation Protocol** Radhika Ranjan Roy, 2018-09-03 Session Initiation Protocol SIP standardized by the Internet Engineering Task Force IETF has emulated the simplicity of the protocol architecture of

hypertext transfer protocol HTTP and is being popularized for VoIP over the Internet because of the ease with which it can be meshed with web services However it is difficult to know exactly how many requests for comments RFCs have been published over the last two decades in regards to SIP or how those RFCs are interrelated Handbook on Session Initiation Protocol Networked Multimedia Communications for IP Telephony solves that problem It is the first book to put together all SIP related RFCs with their mandatory and optional texts in a chronological and systematic way so that it can be used as a single super SIP RFC with an almost one to one integrity from beginning to end allowing you to see the big picture of SIP for the basic SIP functionalities It is a book that network designers software developers product manufacturers implementers interoperability testers professionals professors and researchers will find to be very useful The text of each RFC from the IETF has been reviewed by all members of a given working group made up of world renowned experts and a rough consensus made on which parts of the drafts need to be mandatory and optional including whether an RFC needs to be Standards Track Informational or Experimental Texts ABNF syntaxes figures tables and references are included in their original form All RFCs along with their authors are provided as references The book is organized into twenty chapters based on the major functionalities features and capabilities of SIP
