Nanjing Massacre In History Historiography:

The Nanjing Massacre in History and Historiography Joshua A. Fogel, 2000-03-05 A compelling historiographic study of the Rape of Nanjing during the Sino Japanese War of 1937 1945 one of the worst atrocities of all times and of the event's repercussions

The Making of the "Rape of Nanking" Takashi Yoshida, 2009-03-04 On December 13 1937 the Japanese army attacked and captured the Chinese capital city of Nanjing planting the rising sun flag atop the city's outer walls What occurred in the ensuing weeks and months has been the source of a tempestuous debate ever since It is well known that the Japanese military committed wholesale atrocities after the fall of the city massacring large numbers of Chinese during the both the Battle of Nanjing and in its aftermath Yet the exact details of the war crimes how many people were killed during the battle How many after How many women were raped Were prisoners executed How unspeakable were the acts committed are the source of controversy among Japanese Chinese and American historians to this day In *The Making of the Rape of Nanking* Takashi Yoshida examines how views of the Nanjing Massacre have evolved in history writing and public memory in Japan China and the United States For these nations the question of how to treat the legacy of Nanjing whether to deplore it sanitize it rationalize it or even ignore it has aroused passions revolving around ethics nationality and historical identity Drawing on a rich analysis of Chinese Japanese and American history textbooks and newspapers Yoshida traces the evolving and often conflicting understandings of the Nanjing Massacre revealing how changing social and political environments have influenced the debate Yoshida suggests that from the 1970s on the dispute over Nanjing has become more lively more globalized and immeasurably more intense due in part to Japanese revisionist history and a renewed emphasis on patriotic education in China While today it is easy to assume that the Nanjing Massacre has always been viewed as an emblem of Japan's wartime aggression in China the image of the Rape of Nanking is a much more recent icon in public consciousness Takashi Yoshida analyzes the process by which the Nanjing Massacre has become an international symbol and provides a fair and respectful treatment of the politically charged and controversial debate over its history

Japanese War Crimes during World War II Frank Jacob, 2018-06-08 A challenging examination of Japanese war crimes during World War II offers a fresh perspective on the Pacific War and a better understanding of reasons for the wartime use of extreme mass violence The 1937 Rape of Nanjing has become a symbol of Japanese violence during the Second World War but it was not the only event during which the Japanese used extreme force This thought provoking book analyzes Japan s actions during the war without blaming Japan helping readers understand what led to those eruptions In fact the author specifically disputes the idea that the forms of extreme violence used in the Pacific War were particularly Japanese The volume starts by examining the Rape of Nanjing then goes on to address Japan s acts of individual and collective violence throughout the conflict Unlike other works on the subject it combines historical sociological and psychological perspectives on violence with a specific study of the Japanese army seeking to define the reasons for the use of extreme violence in each particular case Both a historical survey and an explanation of Japanese warfare the book scrutinizes incidents of violence perpetrated by the Japanese vis vis theories that explore the use of violence as part of human nature In doing so it provides far reaching insights into the use of collective violence and torture in war overall as well as motivations for committing atrocities Finally the author discusses current political implications stemming from Japan s continued refusal to acknowledge its war time actions as war crimes

History Textbooks and the Wars in Asia Gi-Wook Shin, Daniel C. Snider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges

and interactions especially in the realms of culture and economy Still the region cannot escape from the burden of history This book examines the formation of historical memory in four Northeast Asian societies China Japan South Korea and Taiwan and the United States focusing on the period from the beginning of the Sino Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951 The contributors analyse the recent efforts of Korean Japanese and Chinese scholars to write a common history of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements In doing so they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided and often conflicting historical memories The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives Through uncovering the existence of different master narratives it is hoped citizens will develop a more self critical self reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self and mutual understanding and eventual historical reconciliation in the region This book will be essential reading for students and scholars of Asian history Asian education and international relations in East Asia

Global Perspectives on Global History Dominic Sachsenmaier, 2011-08-04 In recent years historians across the world have become increasingly interested in transnational and global approaches to the past However the debates surrounding this new border crossing movement have remained limited in scope as theoretical exchanges on the tasks responsibilities and potentials of global history have been largely confined to national or regional academic communities In this groundbreaking book Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows sociologies of knowledge and hierarchies that are an intrinsic part of historical practice Taking the United States Germany and China as his main case studies he reflects upon the character of different approaches to global history as well as their social political and cultural contexts He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue cooperation and exchange
