## **Narrative After Deconstruction:**

Narrative after Deconstruction Daniel Punday, 2012-02-01 Interrogating stories told about life after deconstruction and discovering instead a kind of afterlife of deconstruction Daniel Punday draws on a wide range of theorists to develop a rigorous theory of narrative as an alternative model for literary interpretation Drawing on an observation made by Jean Fran ois Lyotard Punday argues that at the heart of narrative are concrete objects that can serve as lynchpins through which many different explanations and interpretations can come together Narrative after Deconstruction traces the often grudging emergence of a post deconstructive interest in narrative throughout contemporary literary theory by examining critics as diverse as Jacques Derrida Gilles Deleuze Elizabeth Grosz and Edward Said Experimental novelists like Ronald Sukenick Raymond Federman Clarence Major and Kathy Acker likewise work through many of the same problems of constructing texts in the wake of deconstruction and so provide a glimpse of this post deconstructive narrative approach to writing and interpretation at its most accomplished and powerful

*Challenging Theory: Discipline After Deconstruction* Catherine Burgass, 2019-01-04 First published in 1999 this volume perceives that English literature is under threat as an academic discipline In Challenging Theory Catherine Burgass warns against the recent trend towards the conflation of literature teaching with cultural studies in British and American universities Focusing on theory of deconstruction as developed by Jacques Derrida in the 1960s the book redresses some common misinterpretations of Derrida's work relating to the status of metaphysical oppositions Part One discusses textual differences and the ways in which these may dissolve and reform according to different cultural contexts The practical issues associated with teaching literature and literary theory in universities are examined in Part Two while Part Three highlights some of the more invidious claims of literary theorists and questions the value of metaphysical analysis as a tool for political critique Challenging Theory tackles an important debate that lies at the heart of humanities teaching It illuminates the impact on academia of the work of critical theorists over the last thirty years and provides a platform for future reassessment of the relationships between literature philosophy and theory

*Handbook of Narrative Analysis* Luc Herman, Bart Vervaeck, 2019-12-01 Stories are everywhere from fiction across media to politics and personal identity Handbook of Narrative Analysis sorts out both traditional and recent narrative theories providing the necessary skills to interpret any story In addition to discussing classical theorists such as Gerard Genette Mieke Bal and Seymour Chatman Handbook of Narrative Analysis presents precursors such as E M Forster related theorists Franz Stanzel Dorrit Cohn and a large variety of postclassical critics Among the latter particular attention is paid to rhetorical cognitive and cultural approaches intermediality storyworlds gender theory and natural and unnatural narratology Not content to consider theory as an end in itself Luc Herman and Bart Vervaeck use two short stories and a graphic narrative by contemporary authors as touchstones

to illustrate each approach to narrative. In doing so they illuminate the practical implications of theoretical preferences and the ideological leanings underlying them. Marginal glosses guide the reader through discussions of theoretical issues and an extensive bibliography points readers to the most current publications in the field. Written in an accessible style, this handbook combines a comprehensive treatment of its subject with a user-friendly format appropriate for specialists and nonspecialists alike. **Handbook of Narrative Analysis** is the go-to book for understanding and interpreting narrative. **Psychology After Deconstruction** Ian Parker, 2014-05-23 Ian Parker has been a leading light in the fields of critical and discursive psychology for over 25 years. The *Psychology After Critique* series brings together for the first time his most important papers. Each volume in the series has been prepared by Ian Parker and presents a newly written introduction and focused overview of a key topic area. *Psychology After Deconstruction* is the second volume in the series and addresses three important questions: What is deconstruction and how does it apply to psychology? How does deconstruction radicalize social constructionist approaches in psychology? What is the future for radical conceptual and empirical research? The book provides a clear account of deconstruction and the different varieties of this approach at work inside and outside the discipline of psychology. In the opening chapters Parker describes the challenge to underlying assumptions of neutrality or objectivity within psychology that deconstruction poses and its implications for three key concepts: humanism, interpretation, and reflexivity. Subsequent chapters introduce several lines of debate and discuss their relation to mainstream axioms such as psychopathology, diagnosis, and psychotherapy, and alternative approaches like qualitative research, humanistic psychology, and discourse analysis. Together the chapters in this book show how, via a process of erasure, deconstructive approaches question fundamental assumptions made about language and reality, the self, and the social world. By demonstrating the application of deconstruction to different areas of psychology, it also seeks to provide a social reconstruction of psychological research. *Psychology After Deconstruction* is essential reading for students and researchers in psychology, sociology, social anthropology, and cultural studies, and for discourse analysts of different traditions. It will also introduce key ideas and debates within deconstruction to undergraduates and postgraduate students across the social sciences.
