Narratives of Early Virginia, 1606-1625 John Franklin Jameson, 1906 **Adapting to a New World** James Horn, 2012-12-01 Often compared unfavorably with colonial New England the early Chesapeake has been portrayed as irreligious unstable and violent In this important new study James Horn challenges this conventional view and looks across the Atlantic to assess the enduring influence of English attitudes values and behavior on the social and cultural evolution of the early Chesapeake Using detailed local and regional studies to compare everyday life in English provincial society and the emergent societies of the Chesapeake Bay Horn provides a richly textured picture of the immigrants Old World backgrounds and their adjustment to life in America Until the end of the seventeenth century most settlers in Virginia and Maryland were born and raised in England a factor of enormous consequence for social development in the two colonies By stressing the vital social and cultural connections between England and the Chesapeake during this period Horn places the development of

early America in the context of a vibrant Anglophone transatlantic world and suggests a fundamental reinterpretation of New World society **A Preliminary Bibliography on the American Fur Trade** ,1939 Writings on American History ,1909

Building the Worlds That Kill Us David Rosner,Gerald Markowitz,2024-11-05 Across American history the question of whose lives are long and healthy and whose lives are short and sick has always been shaped by the social and economic order From the dispossession of Indigenous people and the horrors of slavery to infectious diseases spreading in overcrowded tenements and the vast environmental contamination caused by industrialization and through climate change and pandemics in the twenty first century those in power have left others behind Through the lens of death and disease Building the Worlds That Kill Us provides a new way of understanding the history of the United States from the colonial era to the present David Rosner and Gerald Markowitz demonstrate that the changing rates and kinds of illnesses reflect social political and economic structures and inequalities of race class and gender These deep inequities determine the disparate health experiences of rich and poor Black and white men and women immigrant and native born boss and worker Indigenous and settler This book underscores that powerful people and institutions have always seen some lives as more valuable than others and it emphasizes how those who have been most affected by the disparities in rates of disease and death have challenged and changed these systems Ultimately this history shows that unequal outcomes are a choice and we can instead collectively make decisions that foster life and health **Roots of American Racism** Alden T. Vaughan,1995 Equally important to understanding the racial dynamics of early America are essays on early English paradigmatic views of Native Americans the changing Anglo American perceptions of Indian color and character and frontier violence in pre Revolutionary Pennsylvania An extensive expose of slaveholder ideology in seventeenth century Barbados is published here for the first time as well as the second half of an essay on Puritan judicial policies concerning Indians All previously published pieces have been revised to reflect recent scholarship or to address recent debates and new headnotes have been added to the essays A general introduction written for this volume links the essays together thematically
