The Testament of Job Maria Haralambakis,2012-09-06 Maria Haralambakis provides a wide ranging study of the pseudepigraphon the Testament of Job Haralambakis begins with textual issues considering the recent publication of a 4th century Coptic codex of the text as well as the more well know Byzantine Greek manuscripts However she also considers a much larger number of Slavonic manuscripts than many scholars Rather than working backwards from the most recent manuscripts to a hypothetical original text Haralambakis presents the manuscripts from earliest to latest as a succession of witnesses to the text of the Testament of Job each valuable as evidence of its contemporary world Haralambakis moves on to examine the structure of the Testament as a remarkable literary work employing narrative theory to demonstrate how the composition works as a well crafted appealing story Gleaning insights from the text s widespread presence in Byzantine and Slavonic Christian churches Haralambakis examines its reception history asserting that in these contexts the story came to be viewed as something akin to a life of saint **On the Cutting Edge: The Study of Women in the Biblical World**
