Building the Navy's Bases in World War II: A History of the Bureau of Yards and Docls, 1940-1946, Volume 2 , Building the Navy's Bases in World War II United States. Bureau of Yards and Docks,1947 *Pacific Ports Manual* ,1920 **New Geographies** Ralph Stockman Tarr, Frank Morton McMurry, 1910 From Maps to Metaphors Robin Fisher, Hugh Johnston, 2011-11-01 During the summers of 1792-94 George Vancouver and the crew of the British naval ships Discovery and Chatham mapped the northwest coast of North America from Baja California to Alaska Vancouver s voyage was the last and longest of the great Pacific voyages of the late eighteenth century Taking the art and technique of distant voyaging to a new level Vancouver eliminated the possibility of a northwest passage and his remarkably precise surveys completed the outline of the Pacific But to map an area is to appropriate it to begin to bring it under control and Vancouver s charts of the northwest coast were part of a process of economic exploitation and cultural disruption Although he and the other great navigators of his age exercised no control over the ideas and enterprises spawned by their voyages their names have come to symbolize the consequences of European expansion good or bad From Maps to Metaphors grew out of the Vancouver Conference on Exploration and Discovery held to observe the bicentennial of Vancouver s arrival on the Pacific northwest coast It brings to light much of the new research on the discovery of the Pacific and illuminates the European and Native experience The chapters are written from a variety of perspectives and provide new insights on many aspects of Vancouver s voyages from the technology employed to the complex political and power relationships among European explorers and the Native leadership While it is no longer possible to celebrate the arrival to the northwest coast of explorers such as Vancouver their achievements cannot be overlooked The charts log books journals and specimens from these voyages are important sources of information and essential for the reconstruction of an image of the Pacific region and its people in the eighteenth century Maps of War

Jeremy Black,2018-10-18 A magnificent visual survey of how conflict was recorded and planned using maps produced at the time to reveal how warfare and its documentation has changed through the centuries There is little documented mapping of conflict prior to the Renaissance period but from the 17th century onwards military commanders and strategists began to document the wars in which they were involved and later to use mapping to actually plan the progress of a conflict Using contemporary maps this sumptuous new volume covers the history of the mapping of war on land and shows the way in which maps provide a guide to the history of war Content includes The beginnings of military mapping up to 1600 including the impact of printing and the introduction of gunpowder The seventeenth century The focus is on maps to illustrate war rather than as a planning tool and the chapter considers the particular significance of maps of fortifications The eighteenth century The growing need for maps on a world scale reflects the spread of European power and of transoceanic conflict between Europeans This chapter focuses in particular on the American War of Independence The nineteenth century Key developments included contouring and the creation of military surveying Subjects include the Napoleonic Wars and the American Civil War The twentieth century including extended features on the First and Second World Wars including maps showing trench warfare and aerial reconnaissance Much of the chapter focuses on the period from 1945 to the present day including special sections on the Vietnam War and the Gulf Wars **New Zealand Journal of Geology and Geophysics**
