**Spatial Biases in Perception and Cognition** Timothy L. Hubbard, 2018-08-23. Our experience of the world is influenced by numerous spatial biases most of which influence us without our being aware of them. These biases are related to illusions and asymmetries in our perception of space relationships between space and other qualities dynamics of moving objects dynamics of scene configuration and dynamics related to perception and action. Consideration of these biases provides insight into how we perceive remember and navigate space as well as how we interact with objects and people in space. This volume introduces and reviews numerous spatial biases and provides descriptions and examples of each bias. The contributors discuss historical and current theories for many biases and for some biases provide new explanatory theories. Providing a one stop shop for information on such a key aspect of our experience in the world this volume will interest anyone curious about our understanding of space.

Manned Undersea Science and Technology Office, 1975      *Youth and Performance: Perceptions of the Contemporary Child* Geesche Wartemann, Tülin Sağlam, Mary McAvoy, 2015-04-30. This publication is the outcome of the third International Theatre for Young Audiences Research ITYARN conference in conjunction with an ASSITEJ World Congress and Festival held in Warsaw Poland in 2014. The ITYARN conferences themes always give a very broad frame to invite researchers from different countries and with diverse Theatre for Young Audiences TYA traditions as well as diverse academic cultures to contribute to an international exchange about TYA. While exiting this exchange is always a challenge. How to talk about aesthetic experiences and concepts of childhood in an intercultural dialogue. This is not just a question of translation but also of culturally determined concepts of TYA. Last but not least are the academic attitudes and modes of critical discussion themselves which are culturally informed and shaped by individual experiences. With this publication ITYARN once again takes up this most interesting task of developing intercultural exchange about TYA. It offers space for a diversity of author contributions and it invites readers with academic and or artistic backgrounds to look for new inspirations for his or her reflections on TYA.
