Perception and Cosmology in Whitehead's Philosophy Paul Frederic Schmidt, 1967 **Directory of American Scholars**, 1982 Pedagogical Encounters in the Post-Anthropocene, Volume 2 Jan Jagodzinski, 2024-04-26 As a follow up to *Pedagogical Encounters in the Post Anthropocene Volume I* this book addresses three major areas in response to the post Anthropocene Technology Neurology Quantum Each of these areas is broadly addressed in relation to the concerns that have arisen both theoretically and educationally As in Volume I the author terms these to be encounters as each area presents a particular problematic when addressing the phase change that the planet is undergoing where the anthropogenic labour of global humanity is contributing to climate change endangering our very existence Technology in education has been a significant development There is a concerted effort to review this development placing stress on the rise of learning machines and algorithms In the second encounter the vast literature on neurology is addressed especially neurodiversity and the various symptoms that have emerged in the post Anthropocene era The last section reviews issues related to quantum theory as this is fundamental to tensions between physics and metaphysics The volume concludes with the author's own pedagogical proposal for the future *Hegel and Whitehead* George R. Lucas Jr., 1986-01-15 Hegel and Whitehead presents a careful exploration of the similarities between these two formidable representatives of systematic philosophy Some of the most distinguished scholars in European and American philosophy converge herein to explore the similarities in Hegel's and Whitehead's contemporary influence as well as in the content of their respective systems and in their philosophical styles This volume begins with important critical comparative and historical assessments of the contemporary problems in metaphysics philosophy of science philosophy of mind ethics social thought and philosophy of religion of history and of culture against the background of the important contributions made to these discussions by both Hegel and Whitehead The result is a collection of vigorous new essays in systematic philosophy that reflect the enduring contributions of these two philosophers to the contemporary philosophical climate on two continents Time and Providence David R. Mason, 1982

Toward a Contemporary Wisdom Christology Leo D. Lefebure, 1988 This book examines the relationship between the biblical trajectory of Wisdom Christology and the Christologies of Karl Rahner and Norman Pittenger and explores the contribution that the wisdom tradition can make to contemporary interpretations of Jesus Christ Contents include The Origins of Wisdom Christology The Christology of Karl Rahner The Christology of Norman Pittenger Wisdom Christology and Contemporary Theology Also includes an index of Biblical and ancient works Charles Olson and Alfred North Whitehead Shachar Bram, 2004 Annotation Through a detailed and thoughtful study of the impact of Alfred North Whitehead's philosophy on Olson's aesthetic theory this book points out the conceptual unity underlying what seems to be a sprawl of fragments in Olson's major work *The Maximus Poems* On the one hand concrete poetic units of *The Maximus Poems* serve as a starting point for clarifying how different elements are joined together in one unity On the other hand the book traces the

blending of the whole poem at the macro level following its course through a temporal progress in which the poem moves from one poetic unit to the next that is from a unity of multiplicity to a new unity in which the previous unity is already part of the multiplicity building the new one Thus the book illuminates Olson s theory of the Long Poem as an all containing corpus governed by metaphysical principles equal to life itself enacted in the process of working on The Maximus Poems

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Tragic Beauty in Whitehead and Japanese Aesthetics** Steve Odin,2016-05-19 The present volume endeavors to make a contribution to contemporary Whitehead studies by clarifying his axiological process metaphysics including his theory of values concept of aesthetic experience and doctrine of beauty along with his philosophy of art literature and poetry Moreover it establishes an east west dialogue focusing on how Alfred North Whitehead s process aesthetics can be clarified by the traditional Japanese Buddhist sense of evanescent beauty As this east west dialogue unfolds it is shown that there are many striking points of convergence between Whitehead s process aesthetics and the traditional Japanese sense of beauty However the work especially focuses on two of Whitehead s aesthetic categories including the penumbral beauty of darkness and the tragic beauty of perishability while further demonstrating parallels with the two Japanese aesthetic categories of y gen and aware It is clarified how both Whitehead and the Japanese tradition have articulated a poetics of evanescence that celebrates the transience of aesthetic experience and the ephemerality of beauty Finally it is argued that both Whitehead and Japanese tradition develop an aesthetics of beauty as perishability culminating in a religio aesthetic vision of tragic beauty and its reconciliation in the supreme ecstasy of peace or nirvana **Whitehead's Philosophical Development** Nathaniel Lawrence,2023-11-15 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1956 Schleiermacher and Whitehead Christine Helmer,2012-10-24 This collection of essays stages a dialogue between Friedrich Schleiermacher and Alfred North Whitehead on significant features of open system The volume offers new options for rehabilitating system for future theological and philosophical thinking by opening system to a flexible relation with changing reality Key ingredients for system are discussed in three areas of contact between Schleiermacher and Whitehead One such ingredient concerns historical precedents figuring crucially in Western systematic philosophy Another feature is the systematic categorization of experience that relates epistemology metaphysics and the empirical sciences System is also brought to bear on pressing contemporary issues such as ethics and religious pluralism *Whitehead's Theory of Reality* Allison Heartz Johnson,1962 **Virginia Woolf as a Process-Oriented Thinker** Veronika Krajčicková,2023-10-02 Virginia Woolf as a Process Oriented Thinker Parallels Between Woolf s Fiction and Process Philosophy introduces Virginia Woolf as a nondualist and process oriented thinker whose ideas are despite no direct

influence strikingly similar to those of Alfred North Whitehead Veronika Krajčková argues that in their respective fields literature and philosophy Woolf and Whitehead both criticized the materialist turn of their time and attempted to reattribute importance to experience and undermine long rooted dualisms such as subject and object the animate and the inanimate the human and the nonhuman or the self and the other By erasing the gaps between these dualities the two thinkers anticipated the poststructuralist thought with which Woolf has been anachronically associated in the last decades Krajčková shows that there is no need to analyze Woolf's fiction via critical and philosophical theories that developed much later This book demonstrates that Woolf and Whitehead's ideas may help us adopt more ecologically friendly selfless intersubjective and harmless modes of being in the present day Both figures emphasize the intrinsic value and importance of each constituent of reality and teach us to appreciate the aesthetic values dispersed throughout our environment *G.H. Mead* Filipe Carreira da Silva, 2007-11-05 G H Mead is rightly considered to be one of sociology's founding fathers yet to date there have been surprisingly few books devoted to his life and work This book fills the gap by introducing Mead's ideas to a younger generation of social scientists Beginning with a biographical account of the main events in Mead's career Filipe Carreira da Silva provides a thorough examination of Mead's social theory of the self the reception of his ideas into sociology and the relevance of his work to the contemporary social sciences He focuses in detail on the core ideas associated with Mead's work including gesture and the significant symbol the I me distinction and the generalized other as well as exploring less well known aspects of his writing This comprehensive introduction to Mead's thinking will appeal to students across the social sciences providing a refreshing perspective on the social nature of the individual self *Transfiguration* Frank Burch Brown, 1983 *Transfiguration Poetic Metaphor and the Languages of Religious Belief* **Contemporary Authors New Revision** Pamela Dear, 2000-06 This volume of Contemporary Authors R New Revision Series brings you up to date information on approximately 250 writers Editors have scoured dozens of leading journals magazines newspapers and online sources in search of the latest news and criticism Writers appearing in this volume include Gail Anderson Dargatz Valerie Martin Isidore Okpewho Philip Roth **British Philosophers, 1800-2000** Philip Breed Dematteis, Peter S. Fosl, Leemon B. McHenry, 2002 Essays on British philosophers engaged with philosophical topics and struggling with what came to be known as empiricism rationalism naturalism natural theology and liberalism **A Path into Metaphysics** Robert E. Wood, 1990-01-01 **Phi Kappa Phi Journal** Phi Kappa Phi, 1963 *The Rehabilitation of Whitehead* George R. Lucas, 1989-01-01 Lucas book competently brings Whitehead's philosophy into dialogue with analytic philosophy This is a topic of great originality and considerable potential importance for the field of philosophy The writing is forceful concise and clear George L Kline Bryn Mawr College Lucas treats Whitehead within the framework of major themes in current Anglo American analytic philosophy viewed against the backdrop of significant historical trends in European and American thought since the Enlightenment This most misunderstood of twentieth century philosophers is critically interpreted here Whitehead

had developed 50 years ago some ideas only now emerging in analytic philosophy Lucas examines the significance of Whitehead's thought for current epistemology of science for the anti foundationalism debate and more generally for modal logic action theory philosophical psychology and the philosophy of mind He shows how some recent analytic philosophy is now developing ideas concerning language personal identity and other topics that are found in Whitehead Lucas concludes with recent problems in relativity theory and quantum mechanics indicating how these bear on the philosophy of science and on the task of forging a comprehensive understanding of nature He examines the debates concerning Einstein and Whitehead on relativity and analyzes the work of Bohm Prigogine and others who have found Whitehead's categories useful for their own success Whitehead is shown to be a historical figure of great importance not an idiosyncratic thinker isolated along with a few enthusiastic followers from the mainstream of contemporary philosophy With Russell Whitehead participated in the same philosophical world that gave rise to analytic philosophy **Physics Envy** Peter Middleton,2015-11-04 Includes bibliographical references pages 259 301 and index
