Perceptionbased Data Procebing In Acoustics:

Perception-Based Data Processing in Acoustics Bozena Kostek,2005-08-19 This monograph provides novel insights into cognitive mechanisms underlying the processing of sound and music in different environments A solid understanding of these mechanisms is vital for numerous technological applications such as for example information retrieval from distributed musical databases or building expert systems In order to investigate the cognitive mechanisms of music perception fundamentals of hearing psychophysiology and principles of music perception are presented In addition some computational intelligence methods are reviewed such as rough sets fuzzy logic artificial neural networks decision trees and genetic algorithms The applications of hybrid decision systems to problem solving in music and acoustics are exemplified and discussed on the basis of obtained experimental results   Transactions on Rough Sets VI James F. Ras,Alicja Wieczorkowska,2010-03-10 Sound waves propagate through various media and allow communication or entertainment for us humans Music we hear or create can be perceived in such aspects as rhythm melody harmony timbre or mood All these elements of music can be of interest for users of music information retrieval systems Since vast music repositories are available for everyone in everyday use both in private collections and in the Internet it is desirable and becomes necessary to browse music collections by contents Therefore music information retrieval can be potentially of

interest for every user of computers and the Internet There is a lot of research performed in music information retrieval domain and the outcomes as well as trends in this research are certainly worth popularizing This idea motivated us to prepare the book on Advances in Music Information Retrieval It is divided into four sections MIR Methods and Platforms Harmony Music Similarity and Content Based Identification and Retrieval Glossary of basic terms is given at the end of the book to familiarize readers with vocabulary referring to music information retrieval   *Transactions on Rough Sets IX* James F.
